

YC-830 Series

Spot Work Lamp

- High-brightness LEDs enhance lighting safety
- 1 high output LEDs with 12-80V DC Power
- Aluminum Base for Increase cooling power
- Spot pattern improves forklift driving safety

YC-5347 Series

Rocket Style LED warning beacon

- 360° Pipe Mount LED Beacon
- 30 high output LEDs with 12-80V DC Power
- Can be used on forklifts and industrial vehicles and engineering vehicles
- Magnet base quick installation on a vehicle metal surface

YC-832 Series

Line Work Lamp

- High-brightness LEDs enhance lighting safety
- 2 high output LEDs with 12-80V DC Power
- Aluminum Base for Increase cooling power
- Line pattern improves forklift driving safety

YC-8743 Series

12-48V Low profile LED Warning Beacon

- 360°Low profile LED Beacon
- 6 different flash patterns for different use,used on engineering vehicles widely
- 48 high output LEDs with 12-48V DC Power
- Magnet base quick installation on a vehicle metal surface
- Special Voltage for heavy duty vehicle use

YC-9950

Heavy-Duty High Performance Warning Beacon

- Robust Construction : Our LED beacon boasts a heavy-duty aluminum base, ensuring durability and high performance in demanding environments.
- Superior Visibility : Equipped with 12 upward-facing LEDs on top for enhanced visibility from above, and 24 primary LEDs providing 360° horizontal coverage.
- Weatherproof & Vibration Resistant : Designed to withstand harsh weather conditions and vibrations, making it ideal for both internal and external applications.
- Advanced Flash Patterns : Featuring 32 flash patterns with phase-changing capabilities, offering extensive customization for your signaling requirements.
