

# ABOUT US

Founded in 1984, Jinye Industrial Co., Ltd. is a professional factory of precision cold and hot forging. The materials of forged products include aluminum alloy magnesium alloy and other special alloy products, etc. Jinye Company adheres to excellent technical experience and advanced manufacturing process, and the product quality can fully meet the strict requirements of customers. Through the continuous improvement of the company's physical fitness and the improvement of forging technology, Jinye Company upholds its competitive advantages and bravely faces new challenges in the forging market now or in the future.

Based on the existing foundation, Jinye Company is constantly striving to enhance the forging technology capability, improve the manufacturing process, develop more high-tech new products, and thoroughly implement the company's established strategy of "leading technology". More importantly, we always keep our promise to customers, provide customers with the best quality and price, and create competitive advantages together with customers.

Continuously strengthen the corporate physique and move towards an international enterprise "Becoming the No. 1 forging plant in the world" is Jinye's goal.
