People with Passion for Result

At BAR , we hold a deep belief that people are one of the most important ingredients of our business. The experience, training and welfare of our employees is of great importance to us. These are the people who give our business, its character. We believe that if our employees are given the correct support and training, they will in turn satisfy the requirements of our customers.

The skills of our workforce and our commitment to continuous improvement and training ensures that we offer our customers the finest quality piston rings and the highest level of services.

Technology that drive continuous improvement

Bar International Inc., is equipped with a wide range of special Purpose machines for production of piston rings from 20-300mm diameter. Our machinery includes induction furnace, turning lathes, milling and double disc lapping grinding machines with chrome plant, phosphating plant & heat treatment furnaces. These machines give BAR manufactured rings the advantage of exact fit in the cylinder, which in turn gives faster bedding-in for prolonged lifespan.

Quality that give you a competitive advantage

Quality is of the highest importance to BAR and to its customers. We have all types of testing equipment for piston rings: Carbon - Silicon analyser (which can make quick analysis of raw material) Profile & KeyStone, Axial height measuring instruments, Tension testing, Light leakage, Microscope for microstructure, plating thickness, etc.

Application for every kind of Engine Available

At BAR, we make customised rings for every kind of engine as per the drawing/ specification provided by our customers. These applications includes rings for 2&3 wheelers, Cars, Tractors, Trucks, Marine Engines, Heavy Duty Engines, Power Generation Engines, Railways, Hydraulics and Automatic Transmissions.

Serving to the
world since **1975**

Satisfied Customers around the globe

BAR has now established relationship with a wide and diverse customer base with more than 200 customers. The buyers to which we supply piston rings vary from OE manufacturers , engine builders to stockists and large dealers & small retailers. Our products are exported to countries in Western Europe, UK, USA, Middle East, Mexico and South America.

The team at BAR has a vast combined experience in the manufacture and sale of piston rings. We concentrate on giving the best support and training to our own people so that they in turn satisfy the requirements of our customers.
