

Kishan Autoparts Pvt. Ltd., a family-owned business established in 1988, has grown steadily through the years to become a leading manufacturer and exporter of connecting rods and engine valves for cars, LCVs, HCVs, earthmovers, marine engines, tractors, and more.

Founded by Shri Shantibhai Changela, in Rajkot, Gujarat, India, Kishan Autoparts has developed an enviable history of efficient production and uncompromising quality of connecting rods and engine valves. Presently, Kishan manufactures and exports about 550+ types of connecting rods and 2500+ types of engine valves to more than 60+ countries worldwide and holds a commanding position in the global market.

Our 22500 sq. mt. facility has been designed to optimize available resources and installed with the latest technology to ensure the highest quality standards in manufacturing and infrastructure. Our in-house forging facility, Kishan Forge Pvt. Ltd., allows us to have complete control over the quality of our products from start to finish.

Kishan Autoparts is certified to the ISO 9001:2015 from TUV-SUD Quality System and is one of the most respected brands for exceptional quality and value. With consistent leadership for over 35 years, Kishan has been exceeding customer satisfaction through exceptional customer service, continuous process and quality improvement efforts and product leadership.

Connecting precision with performance since 1988

Kishan Auto Parts is a leading manufacturer of high-quality connecting rods and engine valves, catering to a diverse range of applications. Our advanced manufacturing processes and state-of-the-art facilities enable us to produce parts that meet the exact requirements of our OEMs and clients. We offer a range of materials to accommodate varying performance needs and applications. With an annual production capacity of 1.2 million connecting rods and 2 million engine valves, we have the capacity to handle orders of all sizes.

Connecting Rods

Our expertise in connecting rods manufacturing extends to an extensive range of materials and types, catering to a diverse range of applications. With over 550 models of connecting rods available in various sizes and materials such as forged steel and aluminum, we are equipped to deliver customized solutions to meet our client's specific requirements.

Types of Connecting Rods

Technical Details

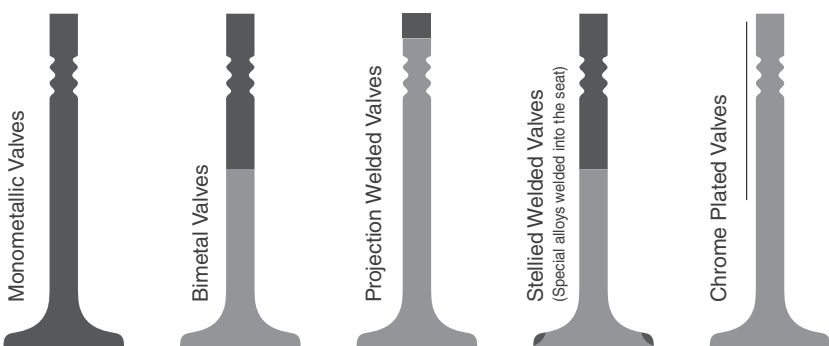

Size Range	
Big End Bore Dia.	Small End Bore Dia.
35 to 110 mm	16 to 70 mm
Center Distance	Weight
85 to 310 mm	0.3 to 10 kg.

Production Capacity
1.2 million pieces per annum

Engine Valves

Our engine valve withstands harsh operating conditions of hot gases and high temperatures and delivers more than expected performance time & again. This is achieved as our valves are made of the finest alloy steel which helps it to remain stable under extreme working conditions. We manufacture both intake and exhaust valves. Our chromium silicon alloy parts are resilient to heat degeneration and ensure a long lifetime.

Types of Engine Valves

Technical Details

Size Range	
Stem Dia.	Head Dia.
5 to 13 mm	20 to 60 mm
Overall Length	
60 to 225 mm	

Production Capacity
2 million pieces per annum

Manufacturing Facilities

Our advanced production unit is equipped with a complete range of machinery and instruments necessary for efficient production. Our fully organized operations are supported by a team of experienced and skilled engineers, supervisors, quality control inspectors, and lab technicians, each proficient in their respective areas of expertise.

Our plant features a state-of-the-art machine shop with nine production lines all housed under one roof. These lines are equipped with the latest CNCs, VMCs, and SPMs, allowing us to manufacture OEM-standard Connecting Rods efficiently and effectively, with the shortest possible lead time while maintaining world-class quality.

Offering a wide range of Connecting Rods & Engine Valves for various applications.

All of our Aftermarket products are built to OE-standards and incorporate the latest upgrades. Our leading position in the automotive OEM business gives us the requisite platform for the local and international replacement business.

Exporting to 60+ Countries across the Globe

Afghanistan, Argentina, Australia, Bangladesh, Brazil, Canada, China, Czech Republic, Egypt, Germany, Iran, Iraq, Italy, Indonesia, Lithuania, Malaysia, Mexico, Netherlands, Nigeria, Poland, Panama, Pakistan, Romania, Serbia, Syria, Singapore, South Africa, Turkey, Tunisia, Thailand, UAE, USA, UK, Uganda, Venezuela and more.
