## BBL Brake products : Unparalleled Safety and Performance

We are proud to present our exceptional Brake products. Some key features are :

1. **Non-Asbestos Composition** : Our products are manufactured using a non asbestos composition, ensuring a safer and healthier environment for both mechanics and vehicle occupants. This composition also provides excellent braking performance.
2. **ECR-R90 Certified** : Our Brake Lining is ECR-R90 certified. This certification guarantees that our product undergoes rigorous testing and complies with strict regulations, ensuring optimal braking efficiency.
3. **Unrivalled Durability** : BBL is built to withstand extreme condition, ensuring long-lasting performance and exceptional durability.
4. **Superior Heat Resistance** : Designed to resist high temperatures, our Brake Lining minimizes the risk of brake fade, ensuring consistent and reliable braking performance.
5. **Enhanced Safety** : Safety is our top priority. BBL provides superior stopping power, reducing braking distances, enhancing overall vehicle safety. Whether you are navigating busy city streets or cruising along highways.
6. **Low Noise and Vibration** : BBL is engineered to minimize noise and vibration, offering a smooth and enjoyable driving experience.
7. **Environmentally Friendly** : As advocates of sustainability, we have developed BBL with eco-friendly materials, ensuring minimal environmental impact without compromising on performance.
8. **Wide Application Range** : BBL is suitable for a wide range of vehicles, commercial vehicles, heavy-duty trucks, two wheelers & three wheelers. It is designed to meet the diverse needs of the automotive industry.
9.  **Brake Pad** : Our revolutionary Brake Pads have cutting-edge NRS technology from NUCAP Canada. With NRS, over 1,000 precisely engineered spikes are created on the metal backing plate, ensuring the strongest bond with the friction material. The NRS technology ensures an unparalleled bond between the metal backing plate and the friction material. This robust connection significantly improves braking performance, providing you with exceptional stopping power and precise pedal feel.
10. Our premium **Clutch Facing**, produced in collaboration with **ASK Technica** Japan, the industry leader in advanced clutch technologies. Our Clutch Facing is designed to withstand rigorous use, ensuring prolonged durability and minima wear. This robust construction guarantees long-lasting performance and reduces the need for frequent replacements.

Choose **BBL** for unrivalled performance, durability, and reliability.
