

广州索德斯汽车零部件有限公司
LSODS Auto Parts Co.,Ltd

FOCUS ON AUTOMOTIVE SUSPENSION AND STEERING SYSTEMS

专注于汽车悬挂及转向系统领域

■ 企业简介 Company profile

广州索德斯汽车零部件有限公司(品牌:LSODS索德斯)成立于2013年,专注于汽车悬挂及转向系统的设计研发、生产制造和服务。

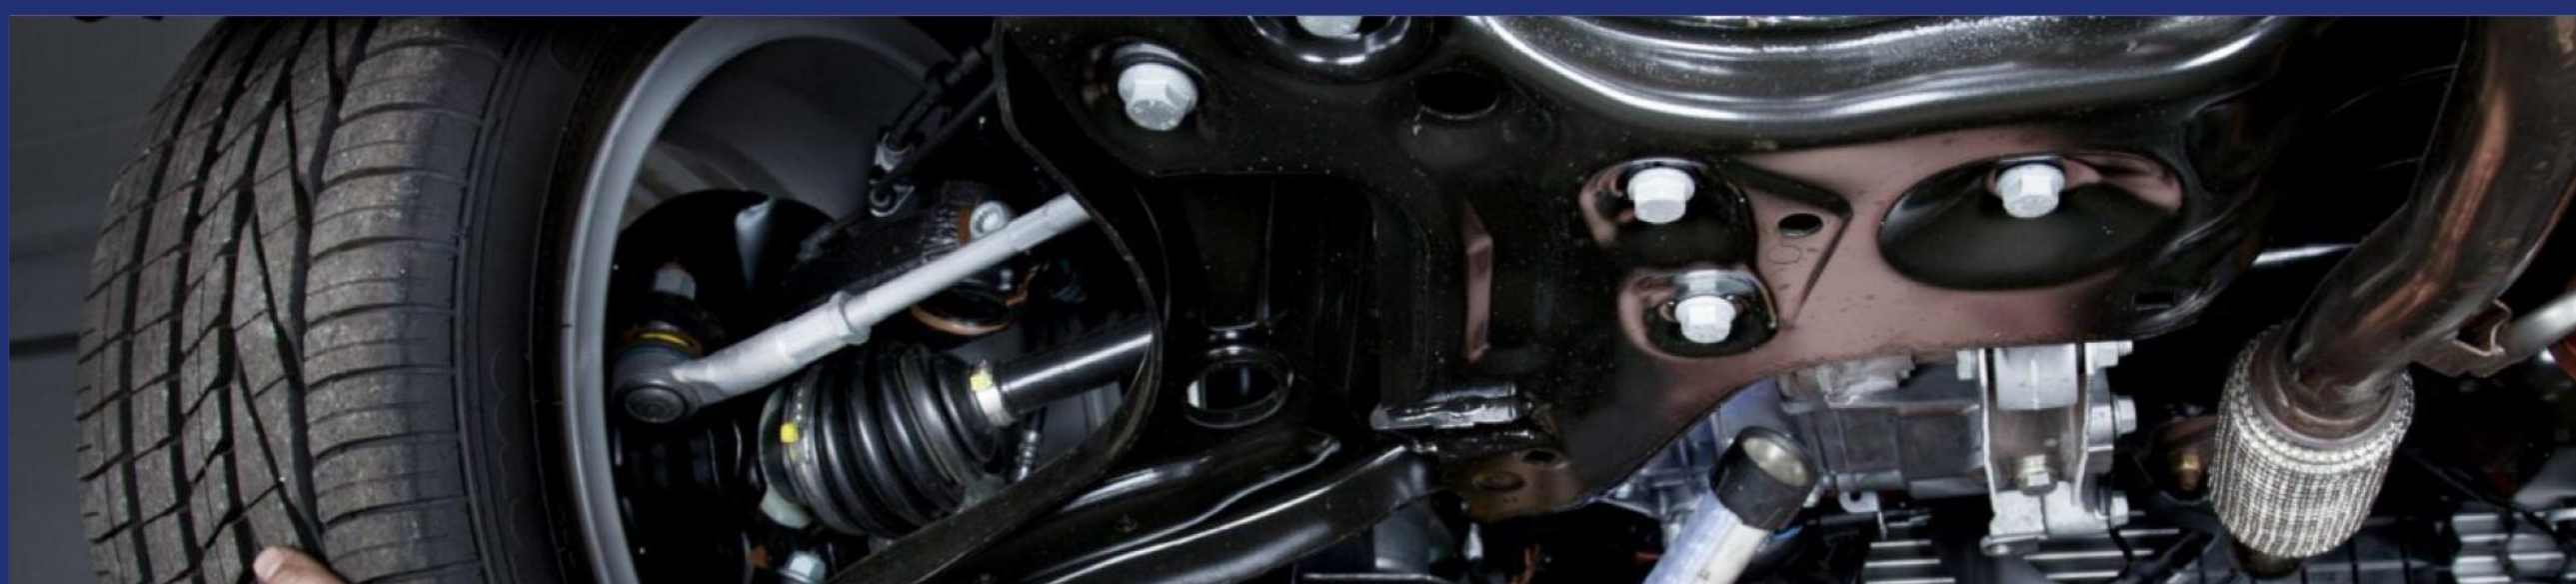

我公司秉承专业品牌、致力品质的理念,引入先进的生产工艺标准,建立了从产品设计、原材料控制、自动化生产等全过程的品质控制链,严格控制每一个环节,多次通过ISO9001国家质量体系认证和审核,形成了汽车控制臂和球头系列、汽车轴承系列、汽车减振器系列、汽车附件(机顶胶、橡胶件、轮胎螺丝等)等产品线。

我公司已在亚洲、欧洲、北美、南美洲、非洲等多国建立了品牌特许经营销售网点,以广泛的车型,高效的服务,并与世界各地的合作伙伴一起携手并进,共赢未来!

LSODS Auto Parts Co., LTD. (brand:LSODS索德斯) was founded in 2013, focusing on the design, development, manufacturing and service of automotive suspension and steering products.

Our company, adhering to the professional brand, is committed to quality , the introduction of advanced production processes and standards, established from the product design with raw material control and automatic production helps guarantee quality at every stage of production ,many times the company goes through ISO9001 national quality system certification and audit checks, allowing us to produce car control arms , wishbones and ball joints , car wheel bearings , car shock absorber , shock absorber mounting kits and shock absorber top gaiters at the highest standard.

Our company has established brand franchise sales outlets in Asia, Europe, North America, South America, Africa and other countries, with complete models、SUK、efficient service, and the world partners hand in hand, we have a win-win future!

我们的工厂

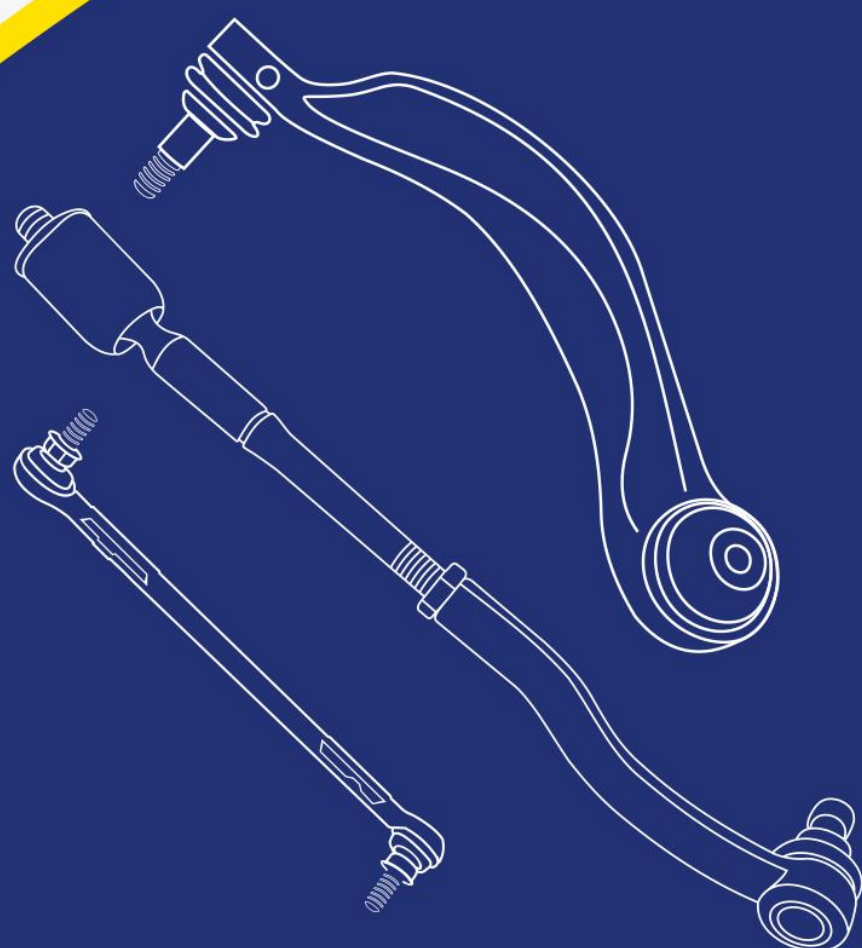

Our factory

索德斯 控制臂 拉杆球头 LSODS Control arm Pull rod ball head

High-quality steering products are the prerequisite to ensure the safety and agility of automobiles. All steering products of Sodexo are forged with high-quality raw materials. Under the precision machining process, the follower arm and steering rocker arm which are OEM matching standard; the ball head and tie rod which have passed the durable salt spray test are safe and rust-free. The performance of the products, which has been repeatedly verified by bench tests, not only ensures that each product can reach the original car quality, but also ensures easier installation and longer service life of the products.

Cover/rear tail door support rod

The function of the suspension is to support the body and improve ride comfort. Different suspension settings will give the driver a different driving experience. The strong strut design of the Kerchis shock absorber effectively protects other parts in the chassis from external impacts; triple sealing and full body rustproofing provide a guarantee for smooth handling and quiet driving.

Eliminate rattles

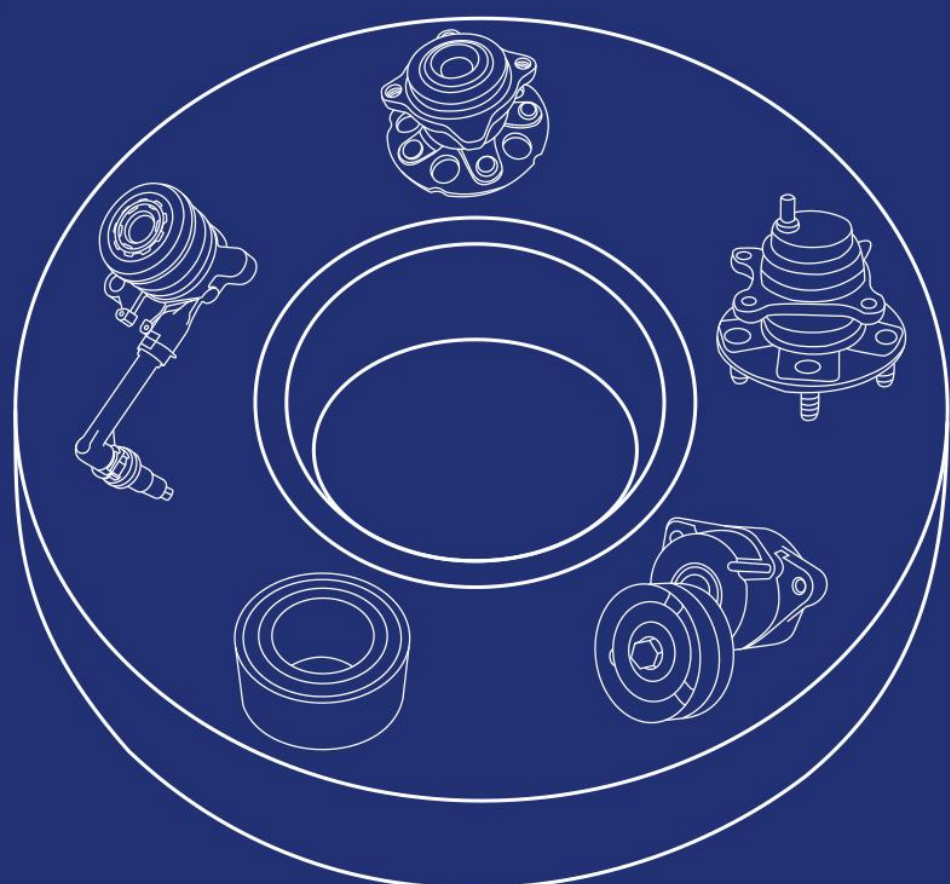

Solving oil leaks

索德斯 轮毂轴承 LSODS Hub bearing

The main role of wheel bearings is to carry weight and transmit power, so they are required to be able to withstand both axial and radial loads. Sodexo wheel bearings are certified to the international standard IATF 16949. High-carbon steel forgings are rugged and scientifically engineered to ensure that the sensors can operate effectively even at temperatures of up to 125°, while also ensuring that the wheel-end mechanism operates with no runout and no noise.

Sodexo respects the original design, but does not just follow it. Under the guidance of years of OEM experience, Sodexo has continuously upgraded and improved the deficiencies of OEM parts during extreme road tests and real-world driving time and time again to ensure that every part supplied brings the greatest value to the customer and the ultimate experience to the user. Sodexo has always been committed to providing end-users with one-stop chassis system solutions for suspension, steering and wheel-end products.
