

# Your watercraft deserves the best

## MAX<sup>G+</sup>

CERAMIC NANO COATING

### 5-Year Warranty - 9H+

System X MAX G+™ redefines professional grade marine coatings, featuring a 30% glossier finish, improved gloss retention, and exceptional slickness all while protecting gel coat and vessel surfaces with the industry-proven engineered MAX™ molecule.

Also available in: **MF** Matte Friendly

## XTREME<sup>S</sup>

CERAMIC NANO COATING

### 5-Year Warranty - 9H+

Providing extreme hardness and resilience for boats and water vessels of all kinds, System X Xtreme Super Slick™ is an ideal coating for protection against friction, heat, and solvents. Incorporating the industry's most durable ceramic technology, it offers years of protection.

## GLASS

CERAMIC NANO COATING

System X Glass™ coating protects your windshield, windscreen, windows, mirrors, glass headlamps, and other glass surfaces from micro scratches while multiplying the surface's hydrophobic properties for two full years. System X Glass™ keeps surfaces cleaner and clearer while improving driver visibility.

## INTERIOR

CARPET, FABRIC, LEATHER & VINYL

System X Interior™ creates a high-tech ultra-hydrophobic protective barrier. Based on advanced nanotechnology to protect your interior - fabric seats, carpet, leather, and vinyl. Spills and stains clean up easily. System X Interior™ protects while retaining your natural look and feel.

### UV Ray Protection

System X® provides maximum UV ray protection for paint, gel coat, and stainless steel to prevent unsightly damage associated with aging and fading colors.

### A Shield Against Corrosives

System X® Marine Ceramic Protection treats surfaces like metal and gel coat with water-resistant properties that prevent spotting and make cleaning dirt and debris fast and easy.

### High Gloss and Application Versatility

System X® Marine Ceramic Protection is highly effective on a variety of surfaces, imparting a high gloss and bringing out the full luster and sheen of your boat's finish.

### Highest Degree of Hardness

System X® Marine Ceramic Protection registers over 9H on the industry's hardness scale — equating to a coating hardness that provides an exceptional level of paint protection.
