

Vehicle Super Capacity Jump Starter

Js300

12V

Function and Features

- **Compatible vehicle**- Cars /SUVs with engines of 3.5L or 3.0T and below
- **High performance** - 1000A max current allows for efficient starting of petrol vehicles up to 3.5 L/T, even if the battery voltage is only 5V.
- Long term installation on cars to assist in battery start-up
- Extend the service life of the original vehicle battery
- Force Startup- Once the battery is less 5V, then start engine via it.
- 100,000 charge/discharge cycles can keep the product using life.
- **Exclusive Intelligent Recognize Car Startup Mode**- Quickly detects complex operating conditions like cold starts or frequent start and stop dynamically allocating energy storage and release through algorithms.
- **Fast and convenient to use** - A full charge takes just 3 minutes from a car battery, 5 minutes-- DC port, or up to 30 minutes--USB-C port.
- Safety, Green and environmentally friendly-No thermal runaway, no risk of expansion, leakage or fire. no chemical battery pollution, recyclable; no transportation problems or hidden dangers in use.
- **Smart App Monitor** - Real-time monitoring of key data of starter and battery. Full startup process records, including discharge curves and historical records. Automatically send alarms for abnormalities
- Free app download, free firmware upgrade
- Waterproof IP65

Normal Voltage	12V	Color	Black
Max. Output Voltage	15V	Size	26*10*5.5cm
Work Voltage Range	5-20V	Weight	1235 g
Avg. Power Consumption	3mA	Starting Current	1000A
Operate Temperature	-40°C~80°C	Capacity	600F*5
App Name	Super Starter	Bluetooth	5.3
Support Mobile phone	Android system version: 5.0 or higher iPhone system version: 11.0 or higher
