

24V/12V/6V Battery Monitor

BM7

NEW

24V
BIG TRUCK

24V
BIG BUS

Function and Features

- Support 24V/12V/6V lead-acid batteries and lithium batteries, work for trucks, cars, motorcycles, boats, energy storage batteries
- The battery can be customized, and the voltage value corresponding to the percentage of battery power can be defined
- Real-time display battery power, temperature and voltage
- Support multi-device management, four devices can be monitored at the same page
- Support 24V/12V startup system and charging system test
- Send alarm notification if the battery is abnormal
- Alarm parameters can be set individually for each device
- Record the track, cost and driving habits of each trip, can export to Excel file
- Record the parking position automatically and provide the CAR FINDER function through navigation
- Store historical data in device up to 72 days (voltage, charge percentage and temperature). Save the data every 2 minutes
- The historical data will not be lost when the device loses power
- The storage of historical data in the app is unlimited.
- Free app download, free firmware upgrade
- Waterproof IP67

Application	All 24V/12V/6V lead-acid and lithium batteries
Average Operating Current	1mA
Input Voltage	3V~35V
Operating Temperature	-30°C~85°C (-22°F~185°F)
Voltage Accuracy	±0.03V
