LOGOS

LOGO APPLICATIONS

IRC SpA presenta al mercato un nuovo sistema di marchiatura LOGOS per i Tessuti rifrangenti RETROLUX® e Termotransfer.

Questo innovativo sistema di marchiatura LOGOS rende possibile marciare anteriormente i tessuti rifrangenti con un LOGO indelebile, visibile, ma non intrusivo.

Inoltre il sistema LOGOS consente di personalizzazione ad hoc tutti i prodotti RETROLUX®, aggiungendo i loghi, i marchi di impresa o altro in base alle esigenze del cliente.

Questa nuova tecnologia garantisce la certezza per quanto riguarda l'origine e/o la tracciabilità del prodotto.

IRC SpA has launched a brand new marking system LOGOS for the RETROLUX® Reflective Fabrics and Thermo transfer. This innovative system makes

it possible to indelibly, visibly and non-intrusively mark the front of reflective fabrics. Moreover, the system allows ad hoc customisation of RETROLUX® products, by adding logos, company brands or else according to the customer's needs. This new technology ensures certainty as far as the origin and/or traceability of the product are concerned.
