

BREATHABLE AND NON BREATHABLE PE FILMS FOR MEDICAL APPLICATIONS

With 50 years of experience ACE is your reliable partner for premium films and laminates. Our products protect people in a wide range applications, from surgical drapes and gowns, protective apparel, single use hygiene articles and woundcare.

MEDICAL PRODUCT RANGE

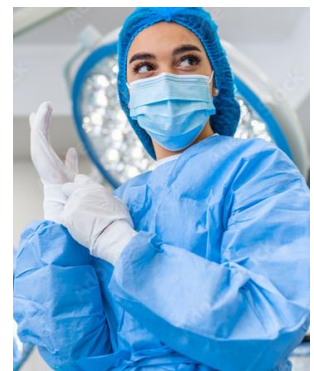

MEDICACE®

Embossed films and laminates, protecting against bacteria and virus. The brand Medicace® represents quality, safety and performance required by the demanding and regulated world of surgical drapes and meet perfectly the requirements set out in the EN13795 norm.

GOWNACE®

Breathable films and laminates for medical gowns.
Virus and Bacterial barrier AAMI Level 4.
Providing comfort for long hours.

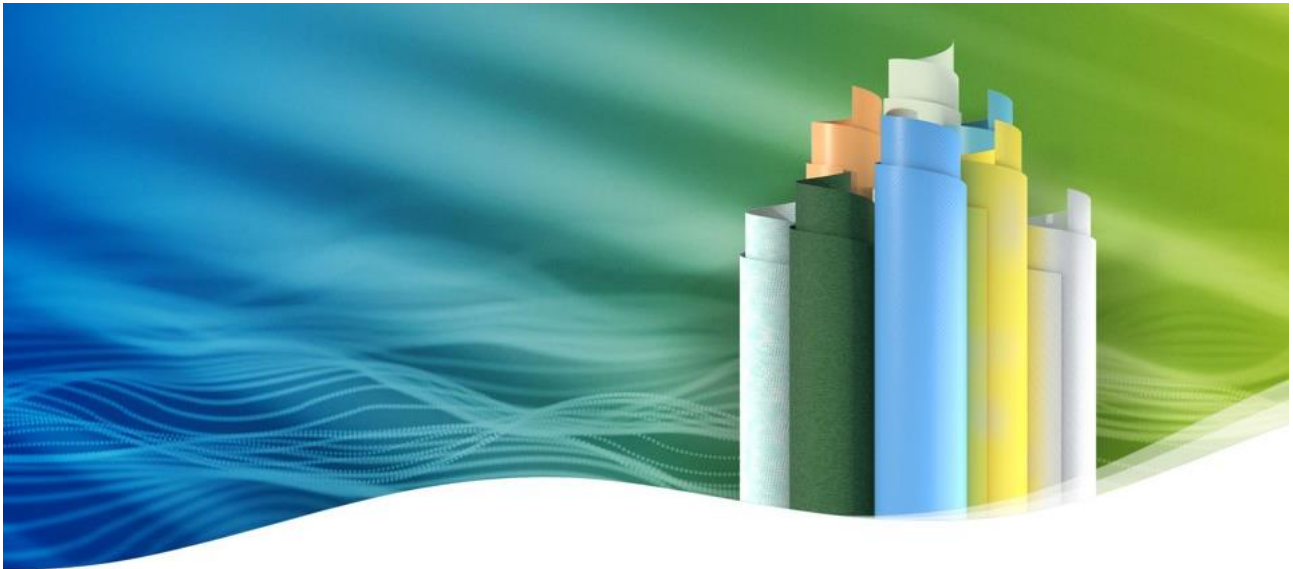

PLASTACE

Wound-Care applications. The Plastace range of films and laminates are specifically designed with the final product in mind - consumer plasters. Soft, flexible and with just about the right amount of stretch, whilst being robust enough to perform well on converting lines.
