

# Hook & Loop Solutions for the Healthcare market

Reliable

Precise adjustment

Ease of closure

## Reusable devices

In collaboration with leading healthcare specialists, APLIX has designed and developed a wide range of hook and loop fastening solutions for reusable devices: **ankle supports, knee braces, cervical collars, surgical corsets, wheelchairs, blood pressure cuffs, straps, spinal supports ...**

For plastic devices, our Intermold® technology makes it possible to simultaneously manufacture an injected plastic part and its gripping hooks area. It allows greater customization and significantly improves the **quality and design** of your device.

## Single-use devices

In collaboration with leading healthcare specialists, APLIX has developed a wide range of hook and loop fastening solutions for single patient devices: **colostomy pouches, surgical clothing, disposable blood pressure cuffs and single-use protective garments.**

As part of patients' day-to-day life, those medical devices must be **reliable, comfortable and intuitive**. With a full range of closures, from hook-to-hook to very thin hook and loop systems, APLIX offers customized fastening solutions to accommodate patient needs.
