Polyester Fibre

For the sustainable future

POLYESTER FIBRES

TESIL®

TESIL® is a high-quality polyester fibre made of recycled PET flakes that are prepared from crushed recycled PET bottles.

- It is suitable for any production of non-woven textiles in dry production processes
- The fibre is suitable for spinning
- The range of linear weight varies from 3.3 dtex to 17 dtex
- Fibre length is 38 - 85 mm
