Solutions for Sustainability, Safety, & Performance for Environment, Infrastructures, Buildings, and People

More than a provider, a partner

At Alkegen, our belief in service extends to every point of contact as transactions transform into relationships. We're more than just a supplier of specialty materials to buy from, we're a partner offering an integrated platform of solutions featuring unmatched service and product innovation of the highest, most uncompromising quality. It's a commitment to supporting our customers.

Heat and Safety Solutions

State-of-the-art nonwovens for protective equipments

Wherever people need to be protected effectively in dangerous situations, only the best is good enough. Our high-performance nonwovens help provide protective clothing with the desired properties, while offering maximum wearing comfort.

Whether it is heat protection, protection from chemicals or cut protection, our customers have been trusting our high-quality technical textiles for years.

Fire Protection Solutions

Wide range of solutions for a variety of passive fire protection applications:

- Commercial buildings: fire, resistant duct
- Systems-critical electric circuit protection
- Transport: railroad tank cars & aerospace
- Marine: ships & offshore platforms
- Specialty: coating additives & other

Our FyreWrap® product family provides proven systems and solutions to meet international fire standards and code requirements in commercial building, transportation, and appliance applications.

We manufacture a wide range of fire protection products for applications where high heat or risk of fire is a problem. We provide systems and solutions to protect buildings, equipment and people against potential fire hazard.

Advanced Materials Solutions

The most sought-after platform of advanced materials in the world

Innovative and custom nonwoven solutions for:

- Building & Acoustics
- Heat and Safety
- Protective Clothing
- Medical & Wipes
- Industrial Converters
- Transportation

Our unique and rapid prototyping service and state-of-the-art production lines allow us to develop new custom solutions very quickly.

Our expertise, as well as our manufacturing and finishing capabilities, enable us to explore new opportunities with customers to bring innovative products to the market. If you need something different, we can develop custom and unique solutions.

We live for responsive partnerships for better service and better products.

We offer a wide range of innovative and environmentally friendly products while ensuring a level of performance and efficiency that meets the expectations of our clients.
