

A TECHNICAL NARROW FABRICS MANUFACTURER

Textile solutions for military industry

About us...

Specialized narrow fabric factory located in
Central Europe, Mursko Središće, Croatia.

Production takes place on more than 3000 m² of covered space.

With more than 150 weaving, knitting and braiding machines,
as well as dye and digital print machines, our annual capacity is over
100 million meters of various narrow fabric products.

What we can offer...

➤ Weaving

Woven fabrics are usually more complex and harder than knitted and are used mostly in demanding technical programs.
Width of woven products, elastic and non elastic, is ranging from 4mm to 130mm.

➤ Braiding

Width of braided products range from 1 mm to 12 mm for round products, and from 1 mm to 16 mm for flat products.

➤ Crochet

Crochet products are specially knitted products that are lightweight.
The widths of elastic and non elastic crochet products ranges from 3 mm to 60 mm.

➤ Dyeing

We are equipped with the latest technology for continuous dyeing of narrow fabric products made from polyamide, polyester and cotton.
Dyeing is performed according to L*a*b* values, Pantone and RAL colours.

➤ Printing

Thanks to the latest technology, we perform direct digital printing on narrow fabrics, width from 10 mm to 70 mm, in all colours, on polyester tapes and webbings.

➤ Sewing, cutting, assembling...

Sewing services , heat and cold cutting, hole punching, assembling narrow fabrics with metal hooks, plastic stopper, eyelets, etc.

Some of the military products we manufactured ...

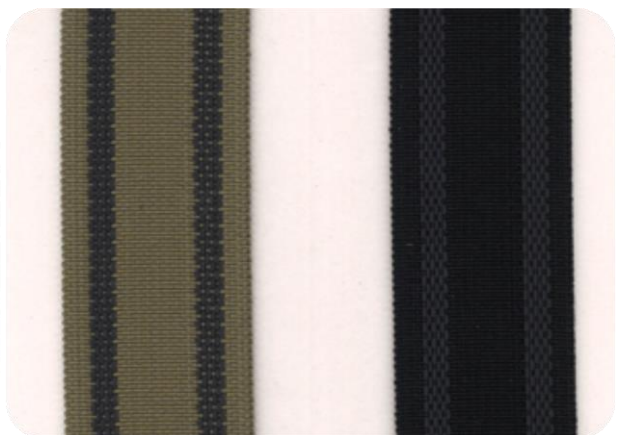

Direct digital printing

Woven elastics, elastics with holes

Anti slip elastic and non-elastic webbings

- **Our products are manufactured according to OEKO-TEX® Standard 100 (Reach included).**

- **We recognise our responsibility for the environment and are dedicated to conduct our activities in an environmentally responsible manner. For this we are certified according to ISO 14001:2015 standard.**

- **Practical solutions.**
With energy renovation of the building, solar panels and heat recovery production process optimization we managed to decrease power consumption by over 35% and significantly reduce factory carbon footprint.

➤ We specialize in production of military **ELASTIC** and **NON-ELASTIC WEBBINGS** and **CORDS** with over 50 years of experience in manufacturing and product development.

➤ Our webbing products are being used as trims, waistbands, suspenders in the application such as TACTICAL VEST, RUCKSAKS, BACKPACKS, HELMETS, POUCHES, CHIN STRAPS, MOLLE, RETENTION STRAPS etc.

➤ **Production according to NATO standards**

Mil – SPECS webbings
