FILAMENT YARNS & SEAMLESS WEAR

## FUTURE- MAKING THROUGH NEW VISION

---

EUROTEX

Eurotex is an international leader on the Filament Yarns and Seamless Garment manufacturing company, that produces for the major international brands. Innovation, flexibility, strong production capacity and know-how our core value.

Eurotex is the first company to produce Seamless Garments in Turkey and the market leader of man-made yarns such as polyamide, polyester, recycled and bio-based yarns.

As a vertically integrated company driven by environmental, social and economic awareness, Eurotex develops advanced and sustainable products for the global textile industry.

EUROTEX

# Fully Integrated Company

---

**Biggest Seamless Garment Manufacturer  
in Europe with 200 Machines.**

**Biggest Nylon Yarn Manufacturer in Turkey.**

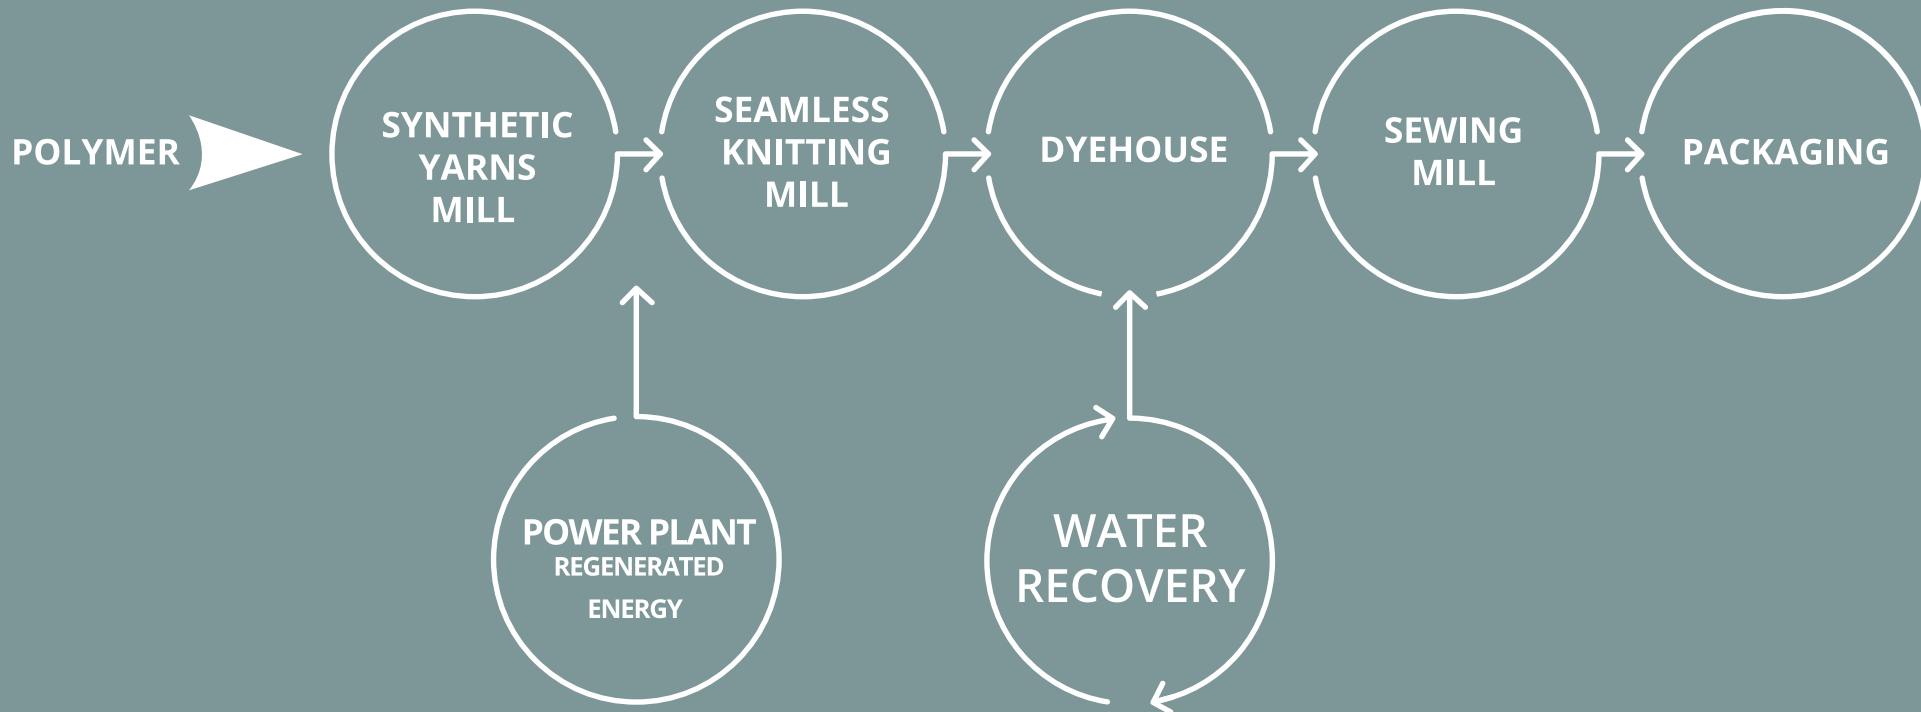

**Biggest Nylon Dye house in Europe.**

**Approved Manufacturer of Unifi Repreve  
Recycled Yarn.**

# Vertically Integrated Company Since 1990

EUROTEX

# CERTIFICATIONS AND SOCIAL COMPLIANCE PROGRAMS

---

Eurotex is committed to embedding social and environmental sustainability throughout its entire business. This means we take action from raw materials to when our products reach the customers. Our main strategy is to keep air, water and soil as clean as possible and avoid toxic substances. We provide this with OEKO-TEX approved production facilities.

# SUSTAINABILITY

## Water

Eurotex embraces sustainability as a core value. The water we use in our production processes is treated at a purification plant and recycled into clean water.

## Energy

By using Cogeneration system, Eurotex generates electrical and thermal energy from natural gas. Cogeneration system is one of the ways to save the energy and use the energy efficiently.

## Workplace

Eurotex provides equal opportunities for all employers with decent workplace and supports with social rights and benefits.

EUROTEX

# SEAMLESS PRODUCTION

---

As a company driven by innovative technology, Eurotex designs and produces seamless garments for intimate apparel, activewear, and fashion for leading worldwide brands.

## FILAMENT YARNS

POLYAMIDE YARNS, POLYESTER  
YARNS, RECYCLED YARNS,  
PLANT-BASE YARNS

---

Starting from different raw materials, also in recycled version, we offer a wide range of tailor-made continuous filament products from super-fine denier, micro filaments to mid-deniers suitable for many product applications: circular knitting, seamless knitting, warp knitting weaving and covering.

POLYAMIDE	POLYESTER	PROPERTIES
COOL-PA	POLYCHILL	ADVANCED MOISTURE MANAGEMENT
COOL-PA+	POLYCHILL+	MOISTURE MANAGEMENT & COOLING EFFECT
WARM-PA	POLYWARM	THERMAL INSULATION
WARM-PA+	POLYWARM+	THERMAL INSULATION AND WARMING EFFECT
BACTERIA-NoPA	POLYPROTECT	ANTIBACTERIAL PROTECTION
FLAME-PA	POLYREFLECT	LUMINOUS FILAMENT YARN
OXY-PA		FAR-INFRARED INNOVATION
SKINSOFT		EXCELLENT MOISTURIZING EFFECT

EUROTEX

# RECYCLED YARNS

EUROTEX

## REPREVE RECYCLED POLYESTER

**Repreve®** is one of the most certified, earth-friendly fibers available in the world. These high-quality recycled polyester yarns are made from plastic bottles and post-consumer materials.

## REPREVE RECYCLED POLYAMIDE

**Repreve®** nylon yarns are made from “pre-consumer” waste. Recycling nylon fibers from our own manufacturing saves a lot of energy and makes the best use of resources. And, it results in a fiber that’s high quality, certifiably sustainable and available with performance technologies, too.

SUSTAINABLE YARNS

# EUROTEX PLANT-BASE YARNS

%Biobased Carbon content

● Biobased Carbon ● Fossil Carbon

%100

## RENEW-BIOPA

Eurotex's Plant-based Polyamide Yarns provide an alternative to conventional petroleum-derived products, thereby reducing greenhouse gas emissions, and environmental impact.

## ECO-BIOPA

Eco-BioPA is a Plant-base Polyamide that is made from Natural Corn. The petrol based polymer has been replaced with Bio-Polymer.

According to % Biobased Carbon Content  
ASTM D6866-21 Method B (AMS) is tested.

SUSTAINABLE YARNS

# WATER-FREE YARNS

Eco-friendly dyeing process to save the water.

Water-free dyeing process involves mixing the colour pigments in with raw or recycled material, before they are made into filaments. By dyeing the yarns without water, there is a reduction in chemical waste, energy usage.

## MASTER BATCH

Eurotex master batch production system makes it possible to increase color diversity in water-free yarns while also reducing the company's dependence on dye suppliers.
