

Quality Technical Textiles

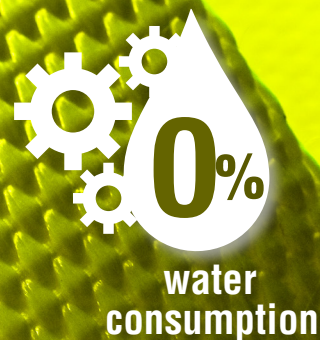

# ECOWEBBING

## MASS DYEING = 0 WATER CONSUMPTION

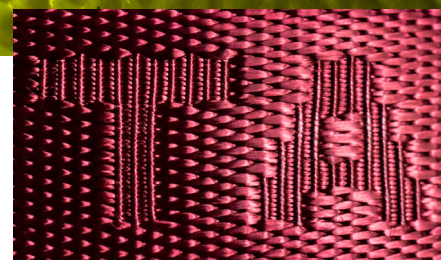

The dyeing process is usually one of the most polluting points for the environment in textile production. Thanks to mass dyeing, we can reduce the use of chemicals, energy, CO<sub>2</sub> emissions and water consumption in Polyester and Polypropylene fibers.

USE WATER TO LIVE AND NOT TO DYE

- Uniform color on the tapes
- High resistance and durability
- Does not fade in the wash

WIDE COLORFUL
