Forsstrom and Carmo**

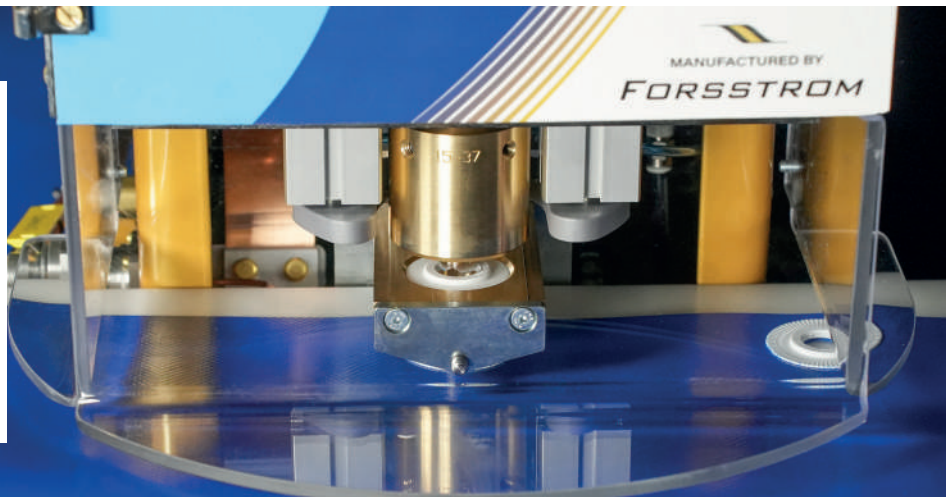

Quick and easy tool change

Eyelets available from Carmo

Service backed by Forsstrom

■ Innovation and performance

- Fast HF welding machine
- Setting, punching, and welding all in one process.
- High quality welding.

■ New and improved

The CP9 features a redesigned eyelet change mechanism for effortless operation. Backed by Forsstrom's service team, the CP9 sets a new standard in reliability and performance.

■ Exclusive technology

The CP9 is a fast HF welding machine for single-sided punching and welding of eyelets. Setting, punching, and welding take place in one process. CP9 provides a stable and uniform high quality weld that ensures a robust product with a long shelf life.
