## OUR PRODUCTS

### SOFTSHELL

---

**Breathable, wind and water resistant Softshells** of different finished weight ranging from 200gsm to 300gsm

- Polar fleece laminated with different knitted or super stretch woven fabrics
- With low, medium and high breathability membranes (TPU, PU, PTFE)
- Breathability ASTM E96 > 650g/m<sup>2</sup>/24hr

# SOFTSHELLS (DIGITAL PRINTS & DOBBY DESIGN)

**Ribstop with camouflaged print**

**Ripstop 2mmx2mm**

**PU membrane with design**

## OUR PRODUCTS

### SUPER STRETCH FABRICS

---

**Mono & Bi Stretch polyester woven fabrics made with conjugate yarns, available in plain, twill/garbadine & ribstop weave.**

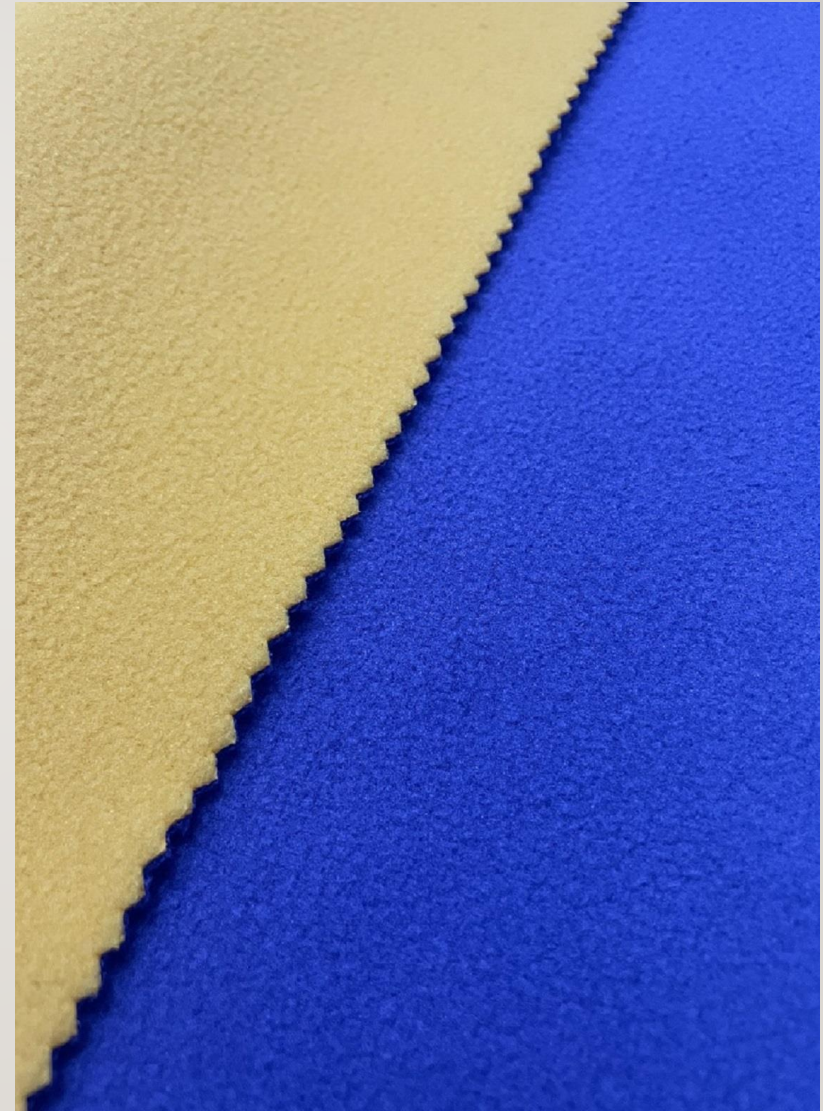

- 50d x 50d
- 75d x 75d
- 75d x 150d
- 150d x 150d

Fabrics can be laminated with different membranes for higher performance purpose, suitable for Jackets , workwear, uniforms, ostomy pouch & other medical purposes

## OUR PRODUCT POLAR FLEECE –VIRGIN & RECYCLED

---

- **Polar Fleece (virgin and 50% recycled)**
  - Single or double side brushed , one side anti-pilling
  - Finished weight available in 140gsm, 165gsm ,180gsm, 240gsm

# PRODUCTION CAPACITY (KNITTING - POLAR FLEECE)

---

- Knitted fabric (greige) - 150tons/ month
- 9 double- knit machines
- 4 brushing machines
- 1 combing & 1 sheering machine
- 2 pilling machines

## PRODUCTION CAPACITY (WEAVING)

- Woven fabric (greige) – 1.2 million meters/month
- 120 water jet looms

## PRODUCTION CAPACITY (DYEING & FINISHING)

---

- Dyeing & finishing capacity  
- 200tons/month
- 9 dyeing machines
- 3 stenters /heat-setting machines

# PRODUCTION CAPACITY (LAMINATION)

---

- 3 lamination machines
- 1.8million meters / month

# LABORATORY FACILITIES (I)

---

- **Automatic Color Dispenser & Solution Machine**
  - To enable custom color-matching and automatic tinting solution to penetrate new channels such as small retail locations.

## LABORATORY FACILITIES(2)

- **Konica Spectrophotometer**

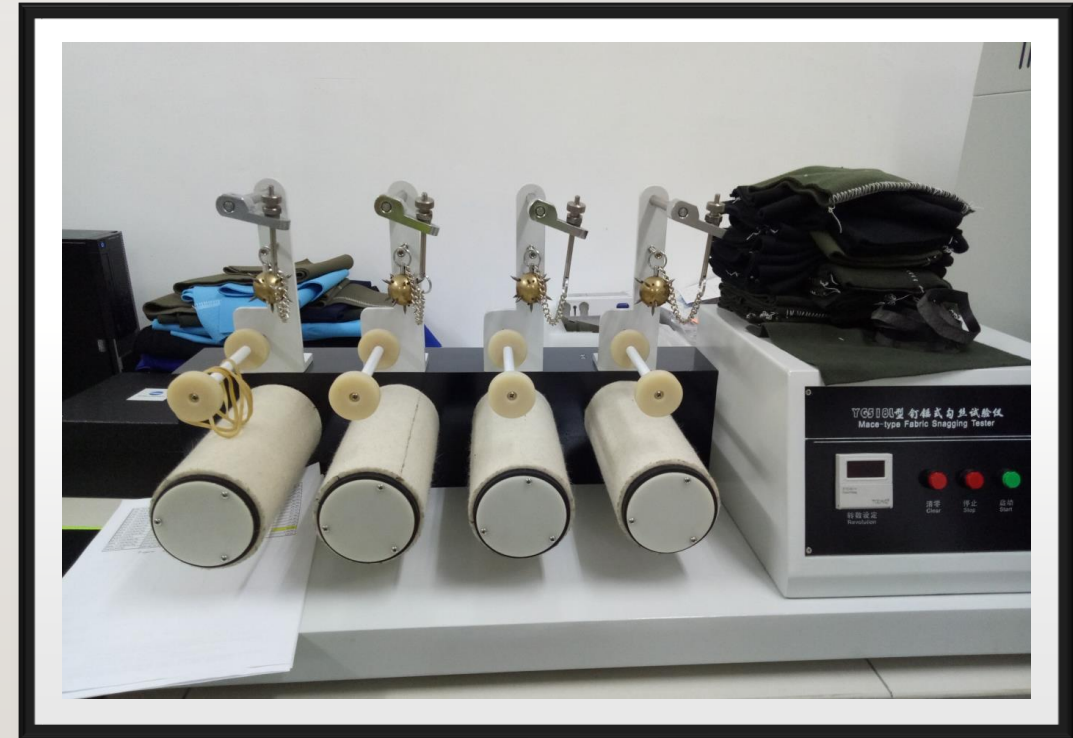

- This spectrophotometer is designed to meet the color measurement need of laboratory, R&D and production users.
- This instrument provides accurate color data for all manner of solid and liquid samples and even measure haze

# LABORATORY FACILITIES(3)

- **Mace-type Fabric Snagging Tester**
  - This machine can rapidly determine the snag resistance of fabric (pull yarn loops from fabric)

# LABORATORY FACILITIES(4)

---

- **Fabric Strength Testing Machine**

- To evaluate fabric's
  - Tensile strength
  - Seam Slippage strength
  - Yarn lea strength

# INVESTMENT PLANS :

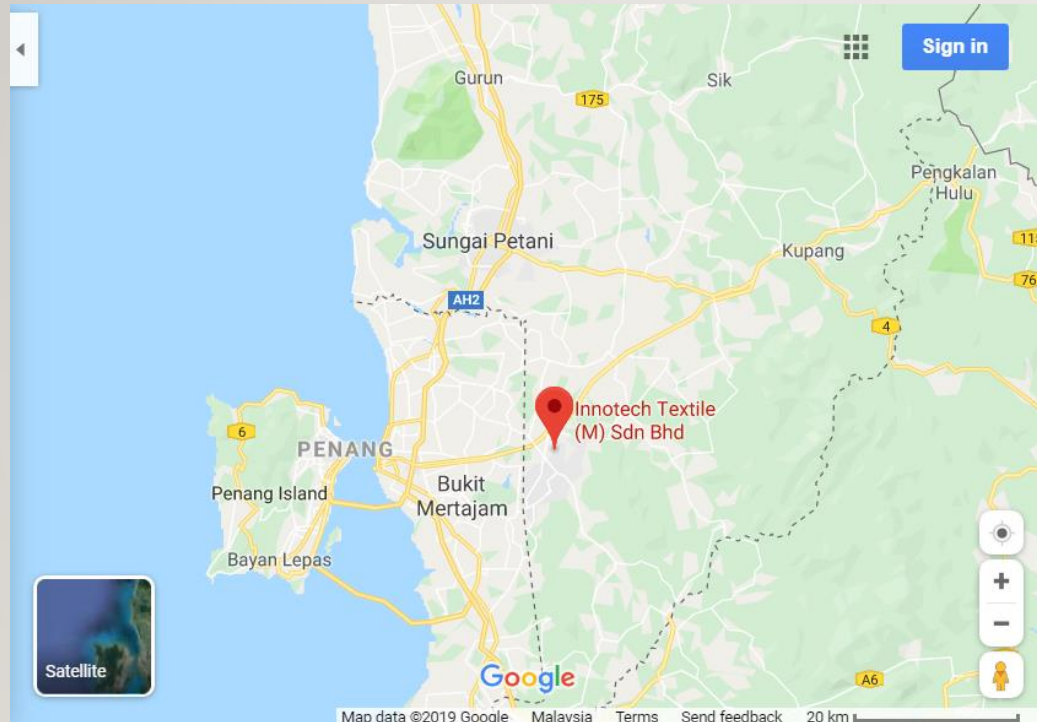

---

- 30 -50 more waterjet weaving looms (230cm) to produce super stretch or high elasticity fabrics
- At least 50% total productions will be made of recycled polyester
- To increase dyeing and finishing capacity to 300tons per month
- Bronzing and coating facilities
- Texturizing machines – to produce texturized yarns for in-house weaving (will focus on recycled polyester yarns)

# CONTACT US :

## **INNOTECH TEXTILE (M) SDN.BHD (1218519-W)**

### **Dyeing & Finishing Factory:**

Plot 65, Jalan Perusahaan, Kulim Industrial Estate, 09000, Kulim, Kedah Darul Aman, Malaysia.
