TDV
INDUSTRIES

ABOUT US

Since 150 years, TDV Industries manufactures and distributes **technical and functional fabrics** for workwear, protective clothing, military and non-clothing businesses.

Our purpose is to provide **comfort and protection** to workers through **resistant and durable fabrics** for clothing they can wear in their workplace. Following our strong values, based on our savoir-faire, our local commitment, and CSR engagements, we design and manufacture quality fabrics in France, **aiming for the lowest possible environmental impact and the most positive possible social and societal impact**.

KNOW-HOW & SUSTAINABILITY

Thanks to our know-how and the attention to detail we bring to each metre of fabric, TDV Industries is today the preferred provider to many prestigious brands. We are favoured not just for the high quality of our products, but for our prime location and rapid reactivity, which ensure **a high-end experience for our customers and end users**.

Our R&D department works daily to enhance the future of textile by using **more and more sustainable raw materials, including new fibres and recycled materials**.

OUR GUIDING VISION: TEXTILE EXCELLENCE

Clothing over **3 million workers** per year

Ethical approach to business:
local roots + respect for people
+ respect for the environment

Over 5% of the annual turnover **invested in R&D**

Heavily investing in recycled solutions for a **circular economy** approach to business

High **in-house weaving capacity**

AVESNIÈRES VUE DU CIEL • 1952

HISTORY

TDV Industries was founded in 1867 , when the Coisne and Lambert families decided to join forces to create a textile factory in northern France.

Initially manufacturers of fabrics for the tyre industry, the wars and societal changes led the brand to move production to Laval, in the Mayenne region, and then to specialise in technical and functional fabrics, particularly workwear.

Today, TDV Industries clothes **over 3 million civilian and military workers** . The 6th generation of the Coisne and Lambert families is currently at the helm of the company, which continues to invest in developing new, more innovative, more natural and ever more environmentally friendly textiles.

THE GROUP TDV - KLOPMAN

TDV Industries, together with Klopman International, since joining in 2016 are the biggest European Group offering the market a complete and competitive range of fabrics for professional, civil and military clothing. The group has strong financial and industrial foundations in Italy and France, covering the whole European market and Asia.

With fabrics sold and distributed in more than 70 countries, the partnership between the two companies is guided by a long-term and sustainable vision.

WHY TDV

01

To source reliable textile solutions that combine **innovation and sustainability**

02

To meet customers' expectations in terms of **technical and functional textiles**

03

To choose reliable quality and products **made in Europe/France**

04

To become an active supporter of **sustainable development**

05

To have a reliable partner with a long **history and stability**

06

To have a partner able to meet customers' expectations with **know-how and a personalised consulting approach**

ENVIRONMENT & SUSTAINABILITY

SUSTAINABILITY

At TDV Industries we are convinced that textile solutions, to meet customers' requirements and standards, must be not only reliable (effective and long-lasting) but also safe (completely harmless, with low environmental impact, high societal impact, and transparency as regards components and manufacturing processes).

Therefore quality, for us, is inseparable from Corporate Social Responsibility (CSR). **We want to contribute to a positive economy that combines technicality, new textile solutions, impact control, transparency, traceability and excellence.**

TDV BOOSTS OVER 20 YEARS OF COMMITMENT IN EXCELLENCE AND CSR

- **Short supply chain** . By integrating most industrial processes in France we reduce transport and therefore carbon footprint of our products. To achieve this goal, wherever possible we work with local suppliers
- **Sustainable raw materials** . To guarantee low impact of raw materials we use only high-quality, certified materials and, whenever appropriate, propose the use of organic and/or Fairtrade cotton, bio-sourced fibres (linen, hemp) or recycled-fibre polyester
- **Recycling or reuse of waste** from the different manufacturing phases
- **Maximum transparency through a yearly report on our Corporate Social Responsibility document** where we track actions and results. TDV Industries is a pioneer on this topic with its first CSR report published in 2012.

TDV is a pioneer in proposing responsible and eco-circular textile solutions.

TDV Industries is shareholder and founder of the French company Renaissance Textile, Europe's largest circular economy project in the textile sector.

The project is a post-consumer recycling facility with a capacity of 9,000 tons per year (in 2024) with the aim to recycle end-of-life textile products while conserving their usability and technical and creative characteristics.

Since 2012, TDV Industries has been committed to the **UN Global Compact** corporate responsibility initiative and its principles in the areas of human rights, labour and anti-corruption.

LABELS & CERTIFICATIONS

The labels and certifications obtained by TDV through the years recognise **our know-how and the excellence** of the fabrics produced. They confirm to our customers that they can trust the company and guarantee **the traceability of all our products**.

TDV Industries processes are certified according to ISO 9001 and ISO 14001 standards, OFG (Origine France Garantie) and recently achieved the EPV (Entreprise du Patrimoine Vivant).

FABRIC RANGE WORKWEAR & PROTECTIVE WEAR

WORKWEAR FABRICS

Ideal for construction, craftsmen and the industry in general

- Wide range from 115 to 450 grams with different colours, available online
- Available in various constructions such as plain, twill, Panama, etc.
- Special technical finishes applied to improve functionality, such as crease recovery, soft finish as well as water and oil repellence
- Flexibility to order custom features and colours.

PROTECTIVE FABRICS

With maximum protection from heat, flames, chemical splashes, molten metal splashes, electrostatic discharges, electric arc, phytosanitary, low visibility activities, and more.

- Wide range of solutions from 200 to 450 g/m²
- Maximum protection and safety for the wearer
- Different technologies available: with surface treatment, with the use of inherent fibres (modacrylic, aramids, viscose FR, etc) or with fibres with specific performance like abrasion resistance (i.e. polyamide)
- Superb comfort and maximum breathability
- Certified for skin friendliness by Oeko-Tex®
- Fabrics suitable for industrial laundering are also available.

The entire TDV Industries range of fabrics is available with sustainable raw material upon request:

Organic cotton, Fairtrade cotton, recycled cotton, recycled polyester, bio-sourced fibres (linen, hemp).

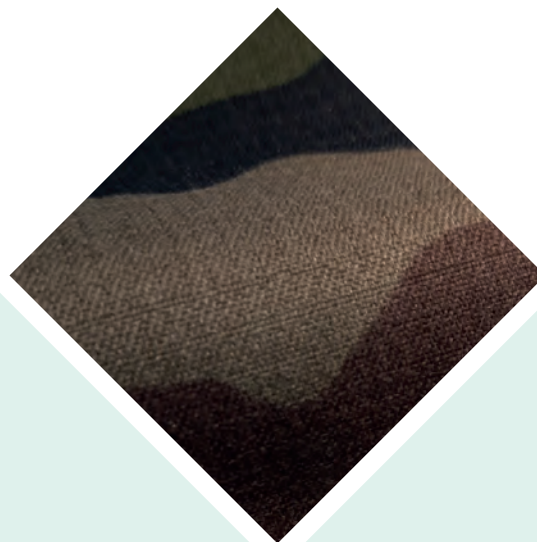

FABRIC RANGE TACTICAL WEAR

TACTICAL WEAR

Fabrics specifically designed for the military sector (printed combat), police, justice, gendarmerie and public tenders in general.

- 100% cotton fabrics, cotton-rich, polycotton or aramid-based fabrics
- Ideal for jackets, trousers, shirts, combat, etc.
- In 2019, TDV invested in a machine dedicated to rotary printing to completely integrate the production of multi-coloured fabrics
- Our production is mostly in-house, from greige to printed finished fabric. This allows us to ensure product quality, but also to control and guarantee the confidentiality necessary for drawings and colours. From a CSR perspective it also allows us to avoid 40,000 km of truck transport annually and to reduce our environmental impact proportionally.

FABRIC RANGE

CONCEPT RANGE

CONCEPT RANGE

Today, the non-clothing business is one of the fastest growing markets. Being a specialised player in technical fabrics, we offer the market a wide range of personalised solutions and fabrics, with a common goal: answering our clients' first needs for solidity, robustness, anti-water repellent, anti-UV performance, and personalisation.

TDV's industrial tool enables us to bring added value to our products: through high standards, our exceptional know-how, the specific customisation, technical finishing, strong quality and diversity of colours. We can provide solutions for many kind of businesses:

- **Luxury bags and leather goods:** we adapt our fabrics for the needs of the most luxurious brands: colours, materials and protective finishes of the fabrics can be discussed for any order
- **Outdoor fabrics:** water repellent and non dyeing fabrics for performance in any climate
- **Furniture and interior design:** designed with endurance, versatility and performance in mind, our fabrics are resistant and long-lasting, which makes them ideal for any kind of application in furniture, and interior design. A vast range of colours and styles puts no limits on designers' imagination

- **Shopping bags:** we have developed a new offer of fabric bags – made in Laval (FR) - simple, elegant, ultra-resistant and with sustainable materials (such as bio cotton, or recycled cotton), that can be customised for each client, (and personalised thanks to our partners for the final steps of printing and embroidery)
- **Industrial applications:** automotive, aeronautic, health, food industry, etc.

- **Fashion and creation:** we are strongly committed to sustainability and responsible production. We regularly collaborate with many fashion creators, especially those that are developing concepts around workwear, recycling and upcycling.

#GOCIRCULAR
THE FUTURE IS CIRCULAR

TDV Industries and Klopman are heavily investing in various projects related to the reuse and recycling of garments at the end of their first life cycle. A global concept with the aim to protect our planet by recycling resources, that will drive the future of the textile industry.
