TECHNOLOGY

**EDDINGTON THREAD MANUFACTURING**

# Eddington Thread has been crafting and engineering Industrial Filament Threads for over 70 years with two goals in mind... **PRIDE AND QUALITY.**

Our objective at Eddington Thread is total customer satisfaction in both product and service. Exacting standards in manufacturing, state-of-art technology, commitment to constant research and development, the world's most modern bobbin winding facility, along with dedicated field representatives, "The Eddington Experts", make us the source of choice. Eddington threads perform consistently on the widest range of sewing equipment.

Our “Edd-Bond” Nylon and Polyester Threads are specifically designed to run on the most demanding, automated, high- speed machinery! What this means to you is: Less down time, increased productivity, less waste, greater sewing, efficiency and most of all . . . increased profitability!

You can count on Eddington Thread to deliver. Our two manufacturing facilities, along with strategically placed warehouses and factory representatives, assure quick responsive delivery on every order.

We are able to meet your needs for any type of industrial sewing thread. Whether it be Nylon, Nomex<sup>®</sup>\*, Kevlar<sup>®</sup>\*, Polypropylene, Polyester, Monofilament, Cotton, Cotton Covered Polyester, Government Spec Threads or Pre - wound Bobbin, we have it all.

Just as our concern for quality endures, so does the integrity of our product. The pride and craftsmanship that our people put into each and every spool carries on the tradition of making the finest threads available from yesterday to today and into tomorrow.

\*Nomex<sup>®</sup> and \*Kevlar<sup>®</sup> are registered trademarks of Dupont Co.

Eddington Thread provides industrial thread to almost every imaginable industry including:

**Electronic Communications,  
The Military, Automotive,  
Aerospace,  
Mattress, Furniture,  
Industrial Fabrics,  
Sporting Goods,  
Leather and Footwear,  
Filtration,  
Lifting and Material Handling,  
Knit Goods and Book Binding**  
...plus many, many more.

Eddington thread is manufactured to spec using the finest raw materials. Processes include: ultra-modern up twisting, down twisting, steam setting and conditioning, dye tubing, dyeing, bonding and finishing, final winding, inspection, labeling and packaging. Our quality control lab monitors all of the steps along the way to assure that you receive the highest quality industrial thread available. To ensure quality, Eddington uses its own thread to manufacture bobbins - ready wound in all styles and sizes - the best in the trade today.

# EDDINGTON IS EVERYWHERE!

*Providing Thread Throughout The World*
