Electrical Engineer

**Pascal**  
Electronics  
Electrical Engineer

We follow technological developments closely.

Our technical expertise, our desire for constant innovation and our solutions to «*impossible*» challenges provide even more functionalities for textiles .

This offers our customers ways to stand out and improve their commercial success.

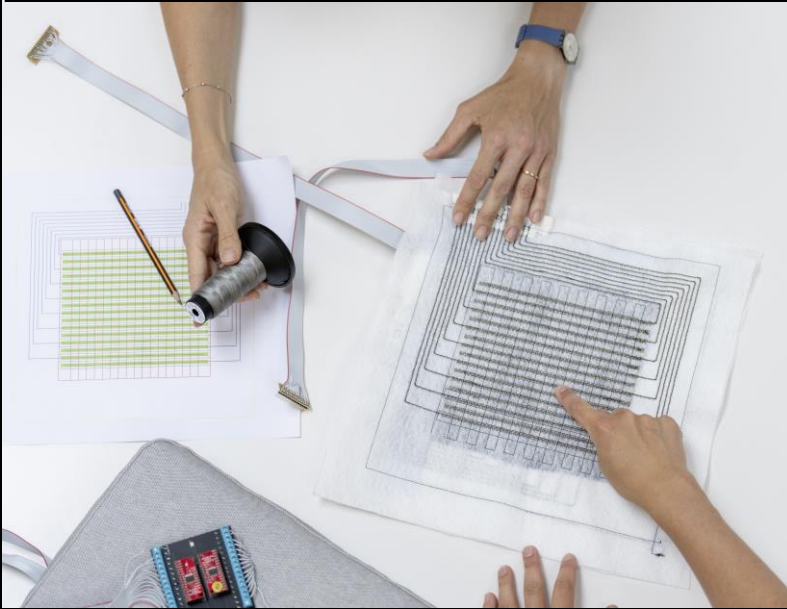

# E-BROIDERY

- Combination of Textiles and Electronics
- Partial and defined fibre placement
- Flexible prototyping and industrial production
- Metallic wires or conductive polymers
- Variation on layering conductive or nonconductive layers
- Integration of electronic components e.g. LED

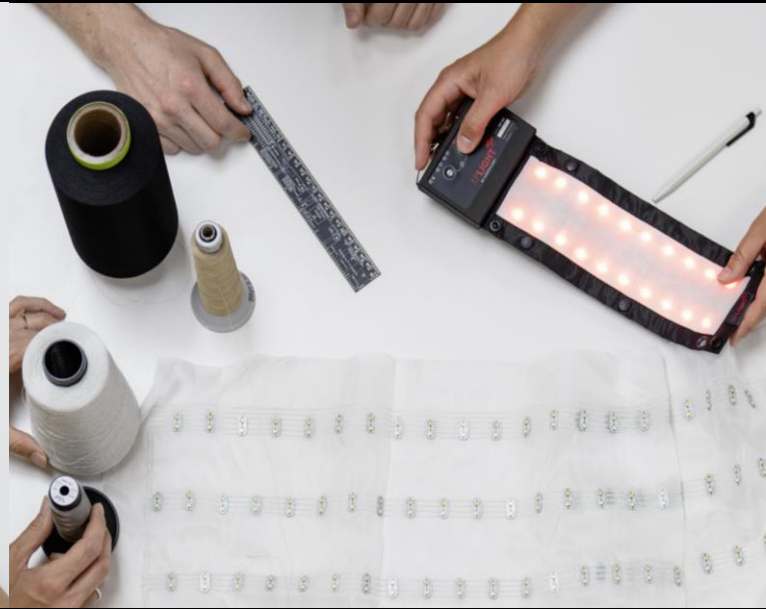

# E-BROIDERY

## SENSING

- Pressure sensing
- Humidity sensing
- EEG Electrodes
- ECC Electrodes

## LIGHTING

- Movie Industry
- Defence
- Security
- Interior Design

## HEATING

- Heating Pads
- Medtech
- Clothing

# LIGHTING

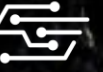

# SENSING

# HEATING

THANK YOU
