Yıllarca İstanbul'da tekstil piyasanın kalbi konumunda olan Sultanhamam'da iplik satışı ile başlayan iş hayatımız, sürekli gelişim ilkemize dayanarak devam etti. 2000'li yıllarda değişen ve gelişen dünya ticaretine adapte olmak adına aldığımız kararlar doğrultusunda OMA İPLİK A.Ş. firmamızı hayata geçirdik.

"İç Ticaret'te olduğu kadar, Dış Ticaret'te de güçlü olmak gerekir" düşüncesini kendimize amaç edinerek bu yolda yurtdışı bağlantılarımızı sağlamlaştırdık. Hâlihazırda iplik ithalatı, üretimi ve ihracatı faaliyetlerini sürdürerek; Avrupa ve Uzakdoğu'dan kendi ithalatını yaptığımız özel tip hammaddeleri kullanarak müşterilerimize en yeni ürünleri sunmaktayız.

1999 yılından günümüze kadar ticaretini yaptığımız ve geniş bir pazar alanı edindiğimiz Nylon 6 ve Nylon 66 sargılı gipe ipliğin, ürün ve pazar birikimi ile piyasanın ihtiyacı olan Sargılı Gipe (likra-elastan ile bükülmüş) iplik üretimini kendi tesisimizde üretmek adına bir yatırım kararı alınmış ve bu kapsamda 2013 yılında 9.000 m² kullanım alanına kendi üretim tesisimizi kurmuş akabinde 2020 Mart ayında 50.000m² olarak Tokat-Erbaa'da yeni bir yatırımı hayata geçirmiş bulunmaktayız. Bu yatırımın ilk etabı olan 15.000 m² üretim tesisimiz son teknoloji makinalarla donatılmış ve alanında Avrupa'nın en büyük gipe iplik tesisi olma unvanına kavuşmuştur. Yıllık 5.000 ton Nylon6, Nylon66 ve Polyester Gipe İplik üretim kapasitesine sahip olan fabrikamız aynı zamanda sürdürülebilir enerji kaynaklarını kullanarak çevre duyarlılığımızı artırmak ve gelecek nesillere daha yaşanabilir bir dünya bırakmayı ilke edinmiştir. Bu kapsamda Recycled (GERİ DÖNÜŞÜM) İplik üretimini de tüm sertifikalarıyla birlikte yapmaktayız.

Özellikle Çorap, Dar Dokuma, Dokuma, Medikal Tekstil, Seamless gibi sektörlerde en kaliteli ürünleri sunmakta olan firmamız, Sektörde, şimdiden Doğu ve Orta Avrupa, Orta Doğu ve Kuzey Afrika ülkelerinde aranan firma pozisyonuna OMAFIL markamız ile yerleşmiş durumdayız.

Since its beginning years ago in Sultanhamam, the heart of textile market in Istanbul, our business life continued unabated based on our principle of constant development. We started our firm named OMA İPLİK A.Ş. in the 2000's in line with our decisions made for adapting to the changing and developing world trade.

Having embraced the idea that "One needs to be as strong in Foreign Trade as in Domestic Trade" as our purpose, we have strengthened our connections abroad in our way forward. We currently continue our operations on importation, production and exportation of threads. We use special type raw materials that we import from Europe and the Far East to provide our customers with the newest products.

We have had experience in producing, and took place in the market with, pre-wound bobbin gimped yarn Nylon 6 and Nylon 66, which we have been trading since 1999 and for which we have obtained a wide range of market space so far. Based on this experience in the market, we have decided to invest in the establishment of our own production facility in 2013 with a usage area of 9,000 m². Then, in March 2020, we executed another investment decision in Erbaa, Tokat, on an area of 50,000 m². As the first stage of this investment, our production facility has been furnished with state-of-the-art machinery on an area of 15,000 m², obtaining the title of being the largest covered yarn facility in Europe in its field. Having the annual capacity of producing 5,000 tons of Nylon 6, Nylon 66 and Polyester Covered Yarn, our factory uses sustainable energy resources in line with its principle of increasing sensitivity for environment and leaving the future generations a more habitable world. We have also been producing Recycled Yarn for this purpose and have all certificates in this regard.

In the sector, we have already achieved the position of being a firm sought after in Eastern and Central European, Middle Eastern and North African countries with our brand OMAFIL.

La nostra vita professionale iniziata con la vendita di filati a Sultanhamam, il cuore del mercato tessile di Istanbul per anni, è avanzata sulla base del nostro principio di miglioramento continuo. Negli anni 2000, abbiamo costituito la nostra società OMA İPLİK A.Ş. in linea con le decisioni prese da noi per adattarci al commercio mondiale in evoluzione e in via di sviluppo.

Prendendo il pensiero di "Occorre essere forti anche nel Commercio Estero così come nel Commercio Nazionale" come il nostro obiettivo, abbiamo consolidato nostri collegamenti esteri in tale contesto. Proseguendo attualmente le attività di importazione, produzione ed esportazione di filati, offriamo ai nostri clienti i prodotti più recenti utilizzando materie prime di tipo speciale che importiamo dall'Europa e dall'Estremo Oriente.

È stato deciso di investire al fine di produrre presso il nostro stabilimento i filati stirati Nylon 6 e Nylon 66, i filati stirati (filati con lycra-elastan) necessari al mercato con esperienza di prodotto e di mercato, che stiamo commerciando dal 1999 ad oggi ed in cui abbiamo acquisito una vasta area di mercato e di conseguenza, nel 2013 abbiamo stabilito il nostro stabilimento produttivo su 9.000 mq di superficie utile e successivamente, nel Marzo 2020, abbiamo attuato un nuovo investimento a Tokat Erbaa su 50.000 mq. Il nostro stabilimento produttivo di 15.000 mq, che è la prima fase di questo investimento, è statao donato di macchinari di ultima generazione e ha preso il titolo di essere il più grande stabilimento di filati stirati d'Europa nel proprio settore. La nostra fabbrica, che ha una capacità di produzione annua di 5.000 tonnellate di Nylon6, Nylon66 e Filati Stirati di Poliesteri ha anche adottato il principio di aumentare la nostra consapevolezza ambientale e di lasciare un mondo più vivibile alle generazioni future. A questo proposito, produciamo anche Filati Recycled (Riciclati) con tutte le certificazioni.

Ci siamo già stabiliti con il nostro marchio OMAFIL nella posizione delle società ricercate in Europa Orientale e Centrale, Medio Oriente e Nord Africa nel settore.

AVRUPA'NIN EN BÜYÜK GİPE İPLİK ÜRETİM TESİSİ

*THE LARGEST COVERED YARN
PRODUCTION FACILITY IN EUROPE*

*IL PIÙ GRANDE STABILIMENTO
DI FILATI STIRATI D'EUROPA*

AVRUPA'NIN EN BÜYÜK GİPE İPLİK ÜRETİM TESİSİ TOKAT ERBAA'DA HİZMETE ALINDI

Yıllık 5 bin tona yakın rekor üretimle yaklaşık 10 milyon dolarlık bir ihracatı ekonomimize kazandıracak olan projemiz bu yetkinliğiyle avrupanın en büyüğü olma özelliğini taşıyor.

Projemiz ilk etabı 15.000 m² kapalı olmak üzere; tam kapasiteye ulaşmasıyla birlikte toplam 50.000 m² kapalı alana ulaşacaktır. Büyük bir ar-ge merkezinide içerisinde barındıracak olan tesisimiz, Tokat Erbaa Organize Sanayi Bölgesi içerisinde hizmet vermektedir. Yaklaşık 5 aylık bir inşaa sürecinin ardından hizmet vermeye başlamış olan projemizin ilk etabında yaklaşık 400 kişi ve tam kapasite çalışmaya başlamasıyla tam 1000 kişiye istihdam sağlanması hedeflenmektedir.

Sürdürülebilir enerji kaynaklarını kullanarak çevre duyarlılığımızı arttırmak ve gelecek nesillere daha yaşanabilir bir dünya bırakmayı ilke edindik.

Bu ilkeyle fabrikamızın birçok alanına güneş enerji panelleri inşa ederek karbon ayak izimizi azaltmayı hedeflemekteyiz. Bu yatırım sayesinde ithalatın önüne geçecek, cari açığa önemli etki sağlayacağız.

OMA İPLİK A.Ş.

UYGULAMA ALANLARI

- Çorap *(Socks)*
- Dokuma Kumaş *(Woven Fabrics)*
- Dar Dokuma *(Narrow Weaving)*
- Dikişsiz Giyim *(Seamless Garments)*
- Aktif Giyim *(Active Wear)*
- Medikal Tekstil *(Medical Textile)*
- İç Giyim *(Underwear)*
- Raşel Örgü *(Rachel Knitting)*
- Yuvarlak Örme *(Circular Knitting)*
