TEXTICAL DYNAMICS

ABOUT US

Gül Branda, which started its professional journey in 1974 in a small workshop in Mercan, has managed to be included in the list of well-known producers on national and global platform by bringing 3 generations of sectoral experience with high-technology technological facilities.

Production journey of our company, which has taken production as basis since its foundation, within its own body dates back to 1992.

Its production facility being based in Arnavutköy on an area of 9000 m2, our company has 4 main production lines and an annual production capacity of 15.000.000 m2.

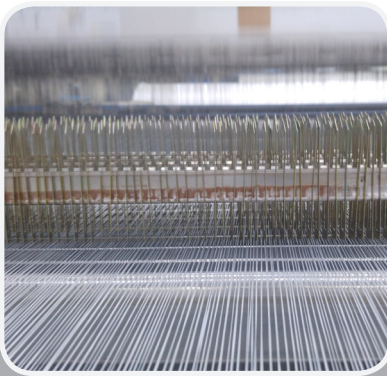

Gül Branda has its own fabric weaving facility in order to take production quality under control in contrast to its competitors in the sector and carry it to the best level apart from PVC Coating.

Gül Branda provides special production opportunities that can comply with the needs and demands of customers apart from mass production through the experiences it has gained and its advanced technological production facility.

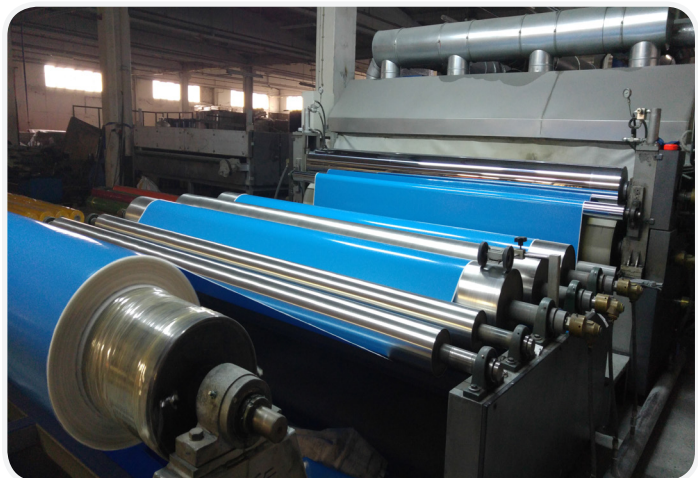

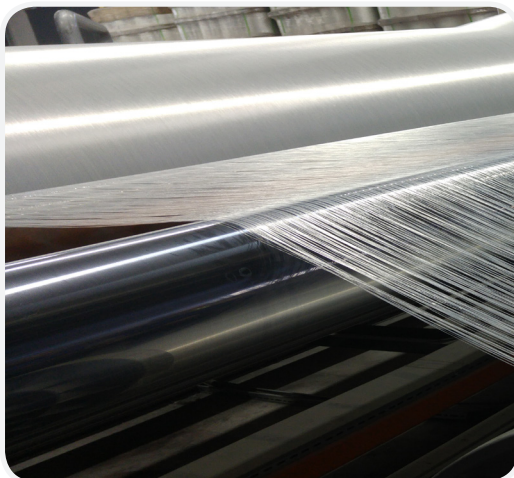

With its strong, experienced and dynamic cadre, our company has managed to be one step ahead by following the innovative and technological innovations, play an active role in shaping sectoral formations and applications and therefore found itself in a respectable position in global market by exporting to over 40 countries in addition to its recognition in the national market.

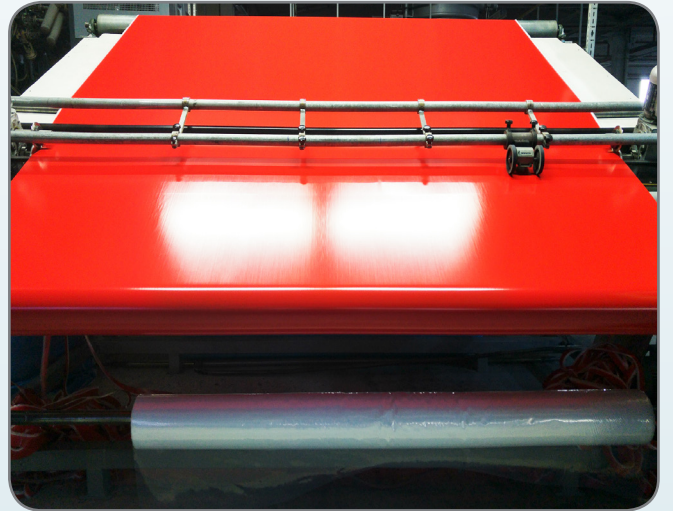

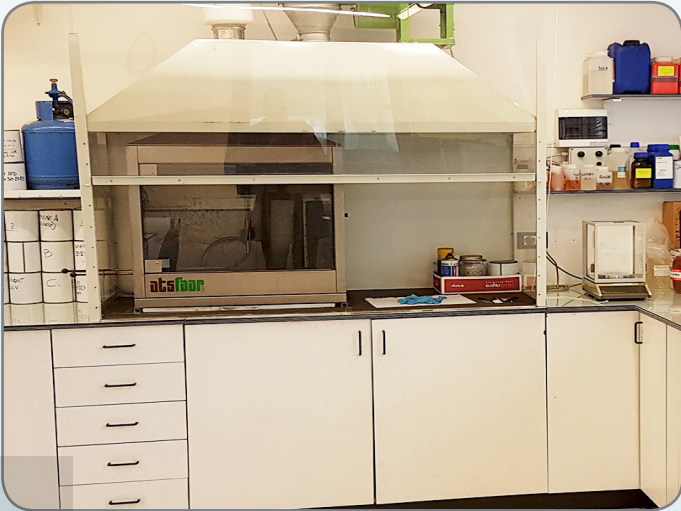

Our company and brands are known for their broad product range, quality, flexible production ability, fast adaptation and good service in both national and global markets.

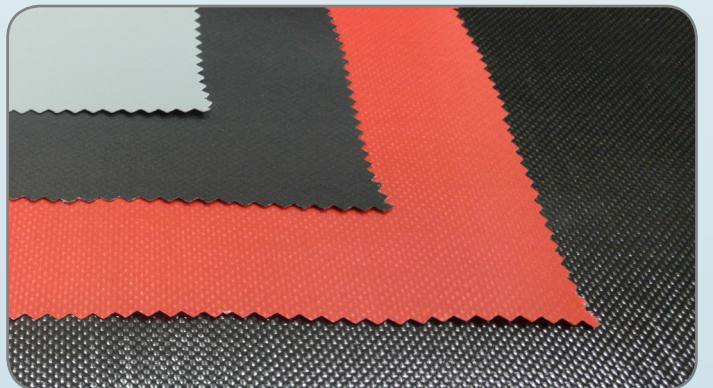

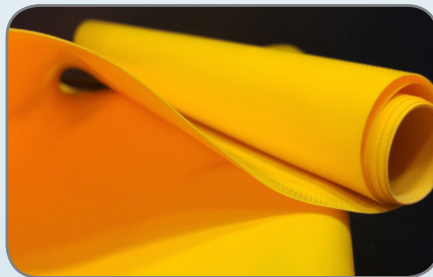

GÜL BRANDA

GÜL BRANDA can appeal to a remarkable part of the total distribution network through a good segmentation with ÇİFT TAVŞANLI and DERBY brands it incorporates within its body.

We mainly focus on market diversification to promote our products in the most competitive means and maintain our reputation in the international markets.
