Final Advanced Materials offers technical solutions to companies and to research centers in the field of advanced materials. Since 1988, the company has been assisting its customers in Europe in the implementation of solutions adapted to extreme conditions. From design to manufacturing, the company makes the customer satisfaction its first priority by putting all its expertise at their service.

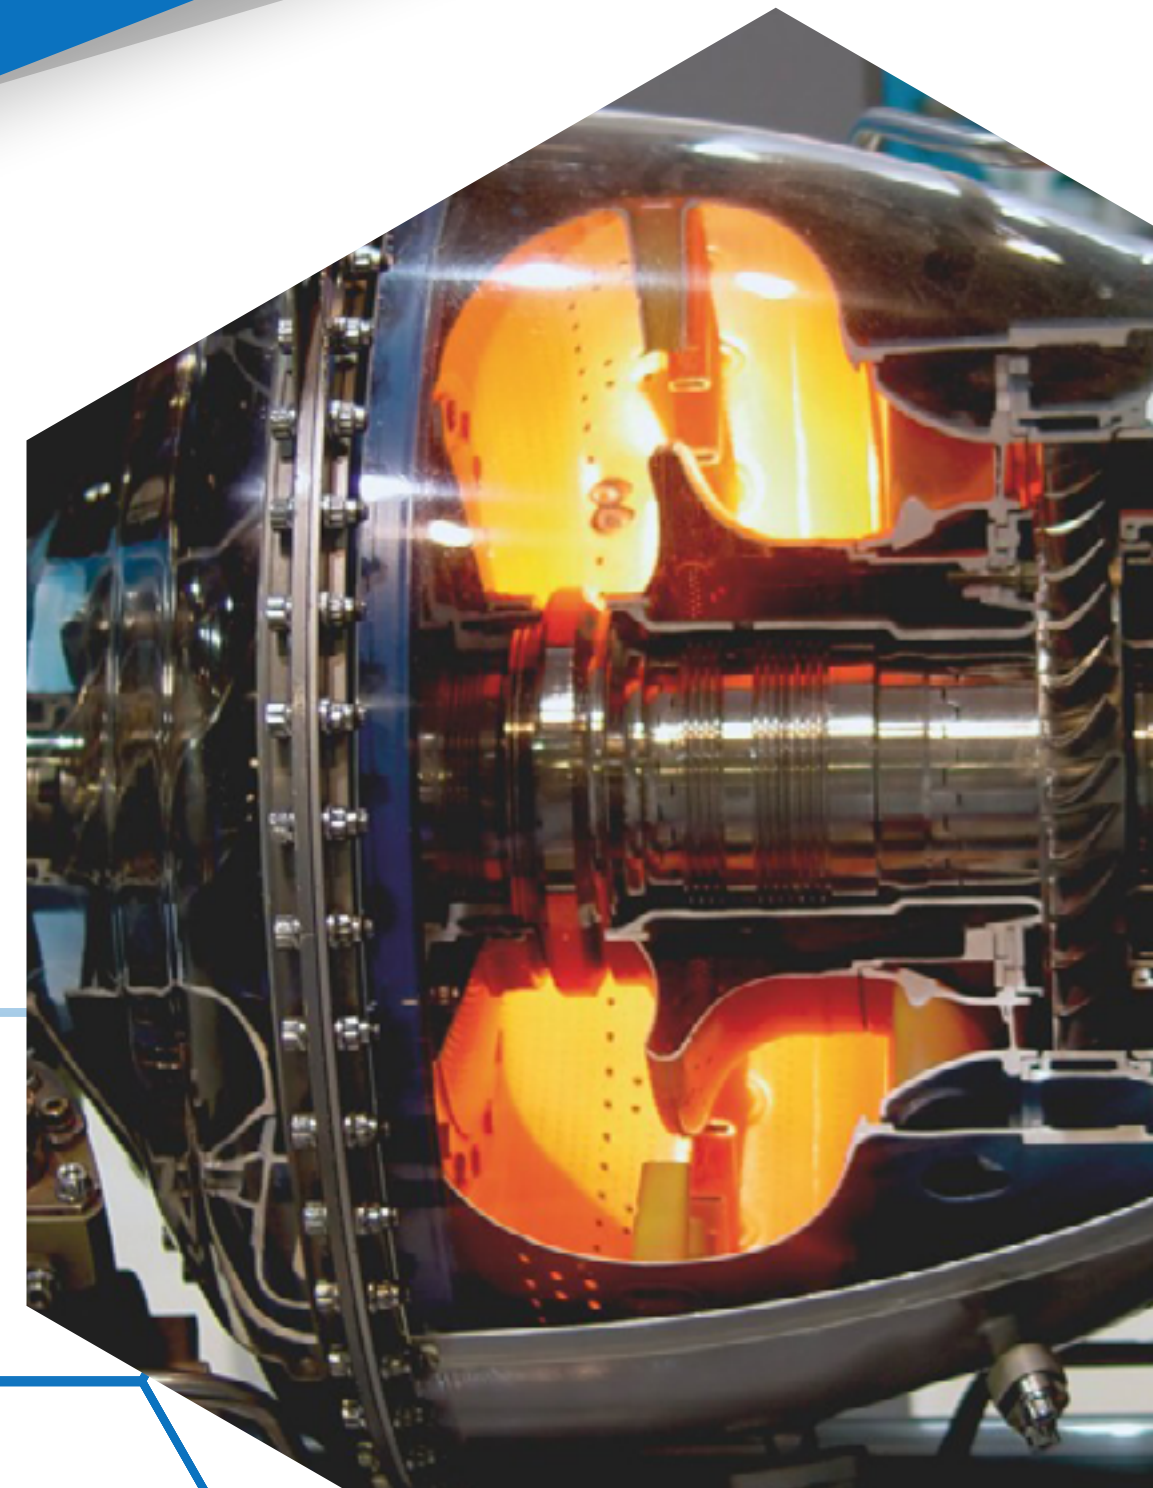

**Final Advanced Materials Sàrl**  
4, avenue de Strasbourg

Certified companies  
ISO 9001  
ISO 14001  
ISO 26000  
ISO 45001

# Solutions up to 3000°C

## Technical ceramics

Alumina  
Zirconia  
Boron nitride  
Aluminium nitride  
Silicon carbide  
Macor® / Shapal™

Custom machining  
Prototyping  
Semi-finished  
Molding  
Extrusion  
Crucible

## High temperature textiles

Aramide fibre  
Glass and Silica fibre  
Basalte fibre  
Biosoluble fibre  
Ceramic fibre  
Zirconia fibre

Bespoke manufacturing  
Custom cutting  
Fire protection  
Thermal insulation  
Fabric / Felt / Paper  
Tape / Sleeve / Rope

## High temperature adhesives

Epoxy adhesive  
Moulding epoxy  
Ceramic adhesive  
Castable cement  
Silicone  
Potting resin

Organic bonding up to 350°C  
Inorganic bonding up to 2200°C  
Thermocouple sealing  
Parts moulding  
Spool overmoulding  
Sealing

## Metals

Inconel®  
Stainless Steel  
Copper  
Brass  
Aluminium  
Steel

Custom machining  
Milling  
Turning  
Bar turning  
Treatment  
Protection

## Plastics & Composites

Glass-Epoxy composite  
Mica-Silicone composite  
HDPE  
PEEK  
PTFE  
POM

Custom machining  
Milling  
Turning  
Bar turning  
Cutting  
Semi-finished

## Refractories

Calcium silicate  
Cordierite / Steatite  
Nanoporous silica composite  
Fibrous insulator  
Microporous insulator  
Zirconia fibre

Custom machining  
Prototyping  
Cutting  
Semi-finished  
Furnace lining  
Heat shield

## Graphites

Machinable graphite  
Rigid / Flexible felt  
Carbographite  
Glassy carbon  
Powder  
Aerosol

Custom machining  
Semi-finished  
Plate / Rod  
Crucible  
Treatment  
High temperature coating

## Powders

Alumina  
Aluminium nitride  
Boron nitride  
Magnesia  
Silicon carbide  
Graphite

Wide range  
Nanopowders  
High purity  
Granulometry  
Specific surface area  
Custom sifting

## High temperature coating

Moisture-free varnish  
Threadlocker  
Paint  
Lubricant  
Demoulding agent  
Hardener

Fluid tightness  
Sealing  
Anti-corrosion  
Greasing  
Wettability  
Surface protection
