VALUES

ABOUT US

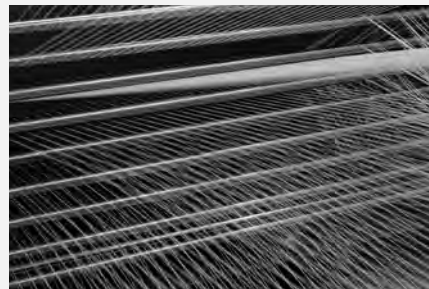

Founded in 1979, at the northern Portuguese city of Guimarães, Têxteis J.F. Almeida, S.A. (JFA) has become a benchmark company in the home textiles' sector. Alongside its modern industrial equipment, it currently employs more than 700 qualified professionals, ensuring their clients quick lead times.

JFA is a vertical company with an outstanding and unbeatable production's capacity. Operating simultaneously in the core areas of Spinning, Dyeing, Weaving and Manufacturing, it promptly delivers clients' requests, with permanent quality control, as well as internal 24/7 Lab, packaging and shipping services.

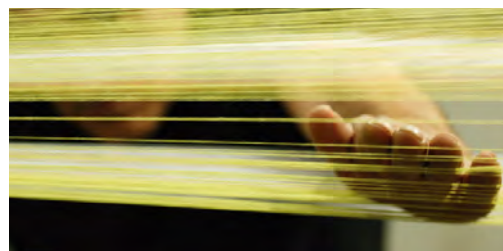

The company has an extensive portfolio in the universe of home textile as well as in Raw Yarn and Dyed Yarn. With a clear focus on foreign markets (80% of production) JFA's differentiation is assured by the quality of the final product, technology, responsiveness, production's flexibility and attractive designs.

The Design department assists in all the product development stages and JFA is responsible for the creation and production of the best collections of bath towels, bath robes, table clothes, beach towels, bed lines, homeware, pet products, aviation and hotel textiles.

THE HOME OF HOME TEXTILES.

ABOUT US

Têxteis J.F. Almeida, S.A. is a vertical company.

The chain production starts with the preparation of fibers and spinning, continues through the intermediate stages of weaving, dyeing and finishing, which are followed by manufacturing, quality control, packaging and shipping.

All stages are carefully monitored in order to fulfil our client's demands.

COMMON TO ALL UNITS

- Wastewater treatment (with treatment and water recovery residuals - 35% of volume used)
- Use of biomass as a source of energy
- + 8,200 photovoltaic panels = 6,000,000 kWh/year of clean energy
- Strong investment for industry 4.0 implementation

OUR WORLD

JFA's presence in the world

SPINNING

The textile spinning unit has a machine park composed of 4 lines of opening, 15 cards, 8 rolling mills and 11 Open-Ends that make up a total of 2880 spindles. With this equipment and the full commitment of 43 employees, JFA can reach 1000 tons / month of yarn.

Production ranges from Ne 2 to Ne 60 in different mixtures.

WEAVING

The Weaving unit is divided into:

- Production Capacity: 700 ton/month
 - Products: Terry I Fabric
 - Modern weaving Unit: 123 weaving machines . .
 - Iteima I Staubli: 73 Jacquards | 50 Dobbys
 - 1 automatic drowing-in machine
 - 2 Warp sizing machine
 - 4 Sectional Warping machines
 - 2 Direct Warping machines
 - 8 weaving machines exclusively for samples
- Production which allows an optimized lead time of 15 days.
- Climatized weaving units with Martel centrals.

DYEING AND FINISHMENTS

JFA integrates the biggest dying unit of Europe. With an astonishing and modern unit machine, JFA is dedicated to piece and yarn dyed.

FINISHMENTS

TECHNOLOGY:

- 3 Stenters with thermal recovery, 2 air / air e 1 air water.
- 2 Tumblers with pre-drying
- 1 High quality blade with inlet vaporization.
- 1 Singeing Osthoff-Senge
- 2 Washing machines
- 1 Dryer
- 1 Dyeing Foulard Benninger and 2 Jigger MCS.
- 1 Stenter Brueckner
- 1 Calender Guarneri Technology
- 1 Brushing machine

The dyeing unit is supported by automatic dosing system for liquids and solids from Colorservice, with high efficiency and precision, without waste.

PIECE DYEING

Daily capacity of 45 tons, monthly capacity 1000 tons.

TECHNOLOGY:

- 23 jets
- High Pressure Machines
- Types of dyeing: reactive, disperse, direct, acid, cationic, and vats.

YARN DYEING

Daily capacity of 15 tons, monthly capacity 330 tons.

TECHNOLOGY:

- 32 Machines
- High pressure machines for bath ratio.
- Space dyeing, Multicolor dyeing until 6 colors at the same time.

LAB

JFA has a 24-hour lab that can answer to new colors in just one day.

The products and services provided by JFA are developed in accordance with high quality standards required by the international markets, namely: ISO, AATCC, ASTM, European (EN) and national (PT) standards, having results checked in external laboratories. The laboratory is certified by the H&M group and complies with the requirements of the INDITEX group.

MANUFACTURING

JFA new manufacturing unit includes several operations, such as, cutting, manufacture, control process and packaging.

All of the above follow a rigorous process, according clients specification, to ensure the pretended quality. High Technology Equipment and qualified teams ensure fast timings and efficiency in process managing.

MANUFACTURE

AUTOMATIC:

Daily Capacity 20 tons

- 2 cutting Machines
- 6 longitudinal automatic sewing machines from Schmale and Magetron
- 6 transversal automatic sewing machines from Schmale.
- Low levels of defect

MANNUAL:

- 12 sewing machines
- 2 glove sweing machines

PACKAGING

- 2 automatic packing machines
- Every final product goes through a metal detector to eliminate the possibility of sewing needles.

BATHROBE MANUFACTURE

- Daily capacity of 1000 bathrobes
- Qualified team of people
- 2 automatic sewing machines for pockets
- 2 automatic cutting machines
- 1 manual cutting machine

BED LINENS MANUFACTURE

- Qualified team of people
- 1 cutting machine
- Unit of diverse machinery for special sewing
- A fashion designer to support product development and production.

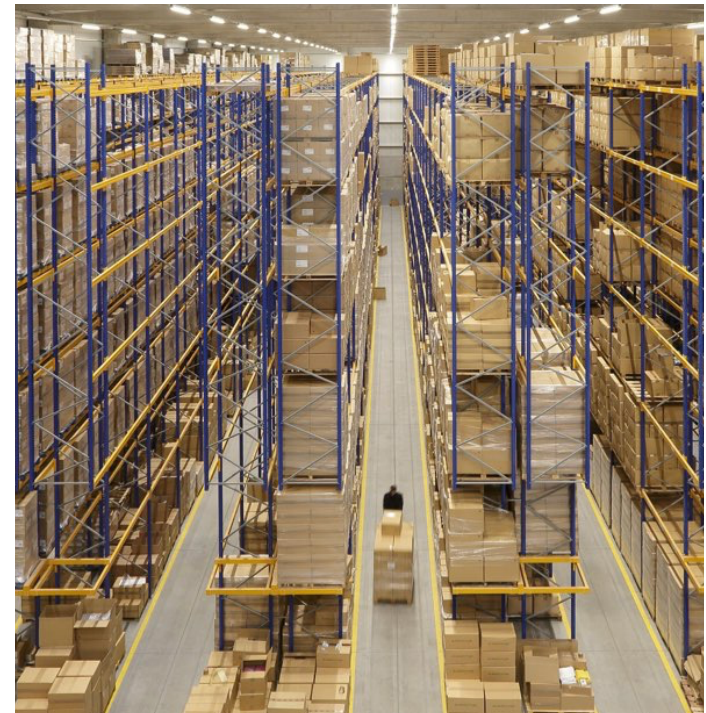

LOGISTICS

Têxteis J.F. Almeida, S.A. Logistics Unit was opened in January 2016 by the Minister of Economy.

This vital piece of infrastructure is the result of an investment of 1,5 million euros and has enabled the company's storage capacity to rise to 4.400 pallets, equal do 160 TIR trucks or 800 tons of finished products.

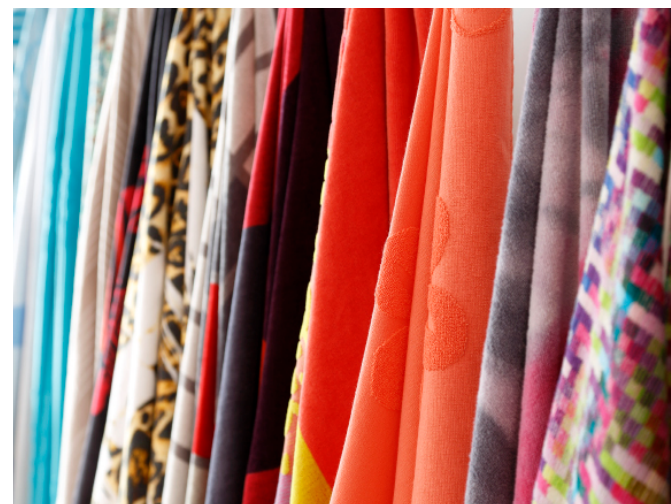

Efficiency and capacity are the main goals to answer clients needs. The entire process is automated, guaranteeing delivery in less than 48 hours.

DESIGN DEPARTMENT

JFA has its own Design department dedicated to product development. This team follows the market trends, and works in partnership with all the clients, to develop collections, with a full range of materials, with proper colors and finishments.

HR

738 QUALIFIED PROFESSIONALS

Employees Benefits:

- Salary above the national average
- Production rewards
- Overtime paid in full
- Health insurance
- Life insurance
- Birth support award
- Special focus on training
- Career development support

CORE PRODUCTS/ SERVICES

YARNS

JFA has an extensive portfolio in Yarns. Raw Yarn (Fibers (100%) of Viscose, Polyester, Bamboo, Modal, Acrylic and also mixtures between them).

Dyed Yarn, resulting from different dyeing processes and applied to different fibers.

It has also developed:

- **Papilio Yarn**, a multi-colour yarn which can be produced in any type of fiber, with a combination of up to 6 different colours per reel, thereby guaranteeing the textile sector an infinite range of possibilities.

- **360 JFA Recycled Yarn**, that results from reusing textile waste from our weaving, namely, selvages, small fabric and yarn remains. All these wastes are then cut and crushed, to which we then add a small percentage of recycled polyester. And a new yarn is born.

YARN DYEING

Têxteis J.F. Almeida S.A. has a strong know-how in yarn-dyeing. Already with over a decade of experience, we dye yarns for various areas of activity, from interior textiles to clothing, tapestry, trimmings, threads, among others.

Within these areas, we dye all types of fibers and natural and synthetic mixtures, in any type of dyeing, from reactive dyeing to vat dyeing.

A high-quality and fast service distinguishes Têxteis J.F. Almeida S.A. from the competition. The market is increasingly unstable and we had to adapt and create considerable internal flexibility.

almeida

DYEING OF BATH, QUILTS AND FABRICS

The piece-dyeing factory is focused on rapidity of response, but giving special priority to quality.

All article dyed and finished in Têxteis J.F. Almeida S.A., has a touch of refinement, and customers are rewarded with a label of excellence.

We monitor our costumers' processes to guarantee that we fully meet their orders.

The team of Têxteis J.F. Almeida S.A is composed of focused and qualified people.

WINDING/ STITCH FINISH

In this section we are equipped with state-of-art machines, with a installed capacity of 370 spindles.

Here we transfer all the thread from our costumer to a cone, with high precision of the meters per coil. At the end of the dyeing process, there is the stich finish phase.

Besides, we perfect the threads using any Ne and fiber chosen by the costumer, to eliminate any defect in the thread.

FINISHES

JFA stands out for its special finishes, divided into the **Regular**, **Aromatic** and **Protector** categories.

JFA already has an extensive list of certifications, of which we highlight:

JFA also has several ongoing certifications:

LOOM MAGAZINE

The launch of Loom in 2017 has been the subject of much curiosity and support. We are now presenting the fifth edition of the Têxteis J.F. Almeida, S.A. magazine in the hope of continuing — and improving — a work that aims at showing who we are.

We invite everyone to another “visit” to our house, which is also yours. And we hope you enjoy our new collections, full of color and novelty.
