GROUP

About us

The company "EUROFISI" was established in the year (1995), parts of the production of final products include the factory which has an area of (12000 m²) and the accompanying warehouse space of (20000 m²). Since the idea of establishing such a factory, the desire of the owner has been to deal with production and business expansion, and so after a long period and experience gained in the state of Austria since (1991 -1994), the owner Dear Mr. Ismail Shallti, he decided to exchange that experience with the ideas acquired in his hometown, and to start opening an independent artisan shop, first for the production of furniture mainly from the raw material of solid wood, where the production was done of the entrance doors of private houses, kitchens and various furniture made to the last detail with perfect details and with a lot of responsibility.

The beginning of this family-run business began to function in small steps, first in the employment of three workers, where after a successful activity and results, the owner continued with the growth of the business and following the trends of time and mobilizing it.

Leader in the production of
thermal insulation material.

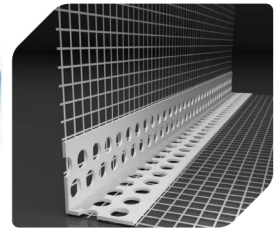

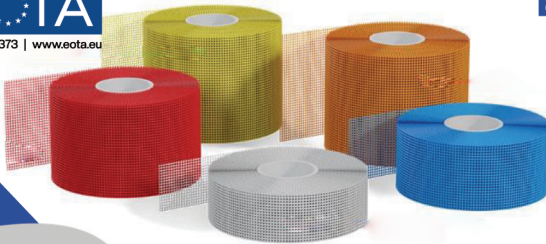

The owner decides to take other steps to expand the business, where in the year (2004) he continues to follow his desire and passion for production, he opened the second factory, which was determined to perform the functions for the protection of tires for cars and heavy vehicles. After a successful activity with the businesses that were already in operation, following the world and European production trends, it was decided to continue again in the production activity, this time in the production of thermo-insulating materials. In the year (2009-2010) the opening of the factory for the production of construction material, very necessary for thermal insulation capabilities, the factory for the production of styrofoam, in which the number of workers is expanded to fifteen workers. After a very successful achievement in the local market, the company aimed to expand the sales market abroad including all the countries of the region and beyond in the countries of Western Europe, after the very successful expansion in the construction market with these materials, seeing the requirements there is a need for the expansion of production in the same field, and after constant consultation with the successful and hardworking staff of our company, based on the analysis of the local and regional market, the owner decides to open a factory new which will improve with the production of facade nets, this concept of such an idea is based on the fact that the production of such material is necessary and of the same family, and is closely related to the thermal insulation materials that are already in function.

Thus, the company "EuroFisi" in the year (2015) begins work in the new factory for the production of facade nets, increasing the number of workers to twenty such, thus reaching the following capacity trends. After an extraordinary success with the open factories already in operation, the need arises to increase the production thus expanding to open the third factory for the production of "Expanded Polystyrene XPS", and employs over fifteen workers. The company already employs over a hundred workers with a high-level managerial staff and professionals in the field always aiming to increase the number of workers and expand the company to a higher level in the near future.
