

Boards & Sheet Coating & Laminating: All for acoustic boards/panels !!

We supply acoustic board coating & laminating lines:

- in a modular design
- to perfectly match your requirements

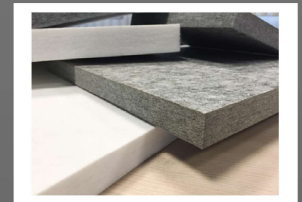

Solventless Polymer coating system:

100% Polymer coating replaces water based systems. Usable to coat, laminate and compact foam and nonwoven.

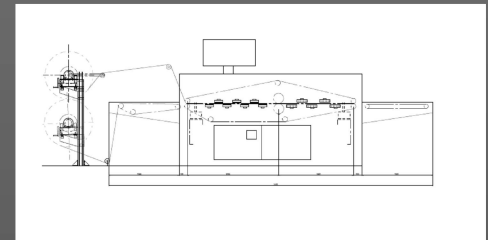

Important ADVANTAGES of the DOTCOAT-System:

- Modular design
- Powerful bonding results
- Clean production
- Zero Emissions, no smell
- Economic spare part pricing
- Simple and efficient production technology
- Comparatively low investment cost
- Quick ROI

Technical data:

- Max. working width 6'000 mm, or upon request
- Max. temperature 220° C
- Max. line pressure 25 N/cm, or upon request
- Max. product height 150 mm
- Length of heating and cooling section up to request

Adhesive application:

- Powder scattering
- Thermoplast adhesives in form of nonwoven, films and nets
- Hotmelt – coater nozzle
- Hotmelt – gravure roll

Options:

- Stackers
- Winding/Unwinding systems
- Accumulators
- Cutting units
