

# For COMPOSITES, Multilayer Organic sheets, and thermoplastic prepregs: Our Flatbed Line Solution: **SC-FBL 1500**

## We supply coating, consolidating & laminating lines:

- in a modular design
- to perfectly match your requirements

### **Solventless Polymer coating system:**

100% Polymer coating replaces water based systems. Usable to coat, laminate and compact foam and nonwoven. Suitable for PP, PA, PU, EVA, PC, ABS, PET, PE, etc

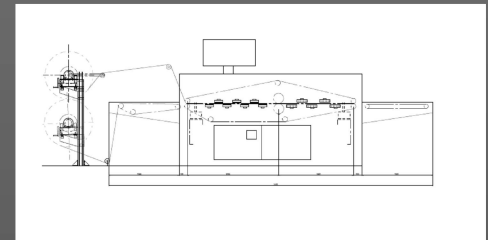

### **Important ADVANTAGES of the DOTCOAT-System:**

- Modular design
- Powerful bonding results
- Clean production
- Zero Emissions, no smell
- Economic spare part pricing
- Simple and efficient production technology
- Comparatively low investment cost
- Quick ROI

### **Technical data:**

- Max. working width 6'000 mm, or upon request
- Max. temperature 260° C
- Max. line pressure 40 N/cm, or upon request
- Max. product height 100 mm
- Length of heating and cooling section up to request

### **Adhesive application:**

- Powder scattering
- Thermoplast adhesives in form of nonwoven, films and nets
- Hotmelt – coater nozzle
- Hotmelt – gravure roll

### **Options:**

- Stackers
- Winding/Unwinding systems
- Accumulators
- Cutting units
