

## RFID LABELS FOR FASHION

Image by macrovector on Freepik

### PURPOSE

These specially developed RFID labels are designed for fashion garments with direct skin contact, offering high wearing comfort. An additional logo print gives the label a premium and elegant appearance.

### MATERIAL COMPOSITION AND PROPERTIES

- **Material:** Satin ribbon (100% Polyester, PES) with an ultra-soft and skin-friendly feel
- **Partial Sealing:** Protection against mechanical and chemical influences
- **Technology:** Integrated antenna and chip
- **Durability:** Limited wash resistance

### APPLICATION METHOD

- **Sewing:** Can be applied as folded or single labels

### ADVANTAGES

- **Reliability:** As data carriers, the RFID labels ensure consistent and secure information tracking
- **Durability:** Good resistance makes them ideal for use in fashion
- **Comfort:** Very soft and comfortable labels ensure high wearing comfort

These RFID labels optimize the traceability and management of textiles throughout their lifecycle, leading to a more efficient and transparent circular economy.

Available as UHF or UHF/NFC

### FOLDED SATIN

### SINGLE SATIN
