

RFID LABELS FOR WORKWEAR AND LAUNDRY APPLICATIONS

Image by macrovector on Freepik

PURPOSE

These specially developed RFID labels are designed for workwear and industrial laundry applications. They are resistant to both chemical and mechanical conditions, ensuring durability and reliability.

MATERIAL COMPOSITION AND PROPERTIES

- **Material:** Satin ribbon (100% Polyester, PES), soft and skin-friendly
- **Sealing:** Protection against mechanical and chemical influences
- **Technology:** Integrated antenna and chip
- **Durability:** High resistance to thermal, chemical, and mechanical stress

APPLICATION METHOD

- **Sewing:** Can be applied as folded or single labels

ADVANTAGES

- **Reliability:** As data carriers, the RFID labels ensure consistent and secure information tracking
- **Durability:** Exceptional resistance makes them ideal for use in workwear
- **Comfort:** Soft, flat labels are comfortable to wear

These RFID labels optimize the traceability and management of textiles throughout their lifecycle, leading to more efficient and transparent circular economy.

Available as UHF or UHF/NFC

FOLDED SATIN

SINGLE SATIN
