

# Hakofix® FR

SWISS MADE 

## The first permanent and inherent flame retardant PA 66 hook-and-loop fastener

### For more functionality

- Excellent wearing comfort
- Outstanding functionality
- Easy processing in combination with aramid webbings
- Washable without loss of flame retardant effect
- No sparking of the ignition source
- No flame extension  
(protects the porter and keeps the protective clothing intact)
- No additional danger for the porter in contact with fire
- No risk of injury due to burning or dripping fibrous particles

### Special characteristics

- No toxic burnt gas deployment (in-cabin room, aircraft)
- Integrated protection against plagiarism
- Dyeable according to specifications with integrable IR-spectrum
- Fulfills the requirements of standards DIN 3415 and Öko-Tex Standard 100
- Protective clothing against heat and flames as per ISO 11612:2015  
Limited flame extension as per DIN EN ISO 15025: 2016-12  
Procedure B

### Ideally suited for protective clothing

- Field-tested for quick adaptability and fixation of body protectors (bullet proof vest) for Army and Police
- Equipment for fighter pilots
- Easy adjustable system with high adhesive properties
- Fast fixing systems for fire brigade equipment

### Transport and Aviation

- In-cabin room on aircrafts (fastening of carpets, pillows, upholstery)
- Assembling aid for light planes, rail vehicles, helicopters, boats, a.s.o.
- FAR 25.853 (a), Appendix F, Part I (a) (1), Amdt. 25/116
- CS 25.853 (a), Appendix F, Part I (a) (1), Amdt. 25/15
- Smoke emission + toxicity according to ABD 0031
