**FOR
// MILITARY
// POLICE
// FIRE
DEPARTMENT**

Kuny AG, with its production plant in Küttigen (Switzerland), has continued to further develop the Hook and Loop fastener over the last 50 years.

Thanks to the fully integrated process and core specialities in weaving, dyeing printing and coating means that Kuny are one of the first who can offer camouflage printing on Hook and Loop fastener.

- // For the first time, ribbons with a functional surface can be printed with any design, contactless, while retaining the surface and functionality in terms of peel and shear strength.
- // In addition to its original functionality, Hakofix® Camouflage as well as Hakofix® FR (flame retardant) can be printed with camouflage patterns and secures the objects to be protected during day and night
- // The Hakofix® Camouflage is ideally suited for extreme outdoor use due to its resistance to weathering and repeated hot-washing as well as excellent physical properties
- // Digital printing with its unlimited repeat length and enormous variety of colors, sets new standards in the design of multi-camouflage patterns
- // Individual camouflage patterns can be precisely set using color coordinates and the IR spectrum
- // Hakofix® camouflage opens up new possibilities and expands the area of application

OUR PRODUCT

CAMOUFLAGE

ARMASUISSE

FR FLAME RETARDANT
