ABOUT US

Sadaqat Limited is a leading, vertically integrated textile & apparel manufacturer from Pakistan, serving international markets with premium Home Textiles. Backed by decades of industry experience, the Company has built a strong reputation for quality, reliability, and long-term partnerships with global brands and retailers.

Our operations span the complete textile value chain – from yarn sourcing, fabric engineering, and design development to garment manufacturing, finishing, and worldwide dispatch. This integrated structure allows us to maintain consistent quality standards, operational efficiency, and speed to market across diversified product categories.

Innovation and product development are central to our growth strategy. Dedicated research and development teams continuously work on new fabrics, constructions, finishes, & sustainable solutions aligned with evolving consumer preferences and global fashion trends. We combine technical expertise with design sensibility to deliver products that enhance comfort, functionality, and aesthetics.

Sustainability, ethical manufacturing, and social responsibility guide the way we operate. Continuous investment in modern machinery, digital systems, and people development enables us to meet international compliance requirements while remaining competitive in a dynamic global environment.

Driven by professional management and a skilled workforce, Sadaqat Limited is committed to delivering value beyond products – strengthening trust, improving lifestyles, and building enduring relationships worldwide.

SADAQAT LIMITED – ADDING QUALITY TO LIFE

“Reliable, durable, cost-efficient workwear with consistent quality from a vertically integrated industrial textile partner entering workwear.”

HIGH MARGIN

HOSPITALITY TEXTILES

Our hospitality textiles are manufactured using MVS (blended) yarn, delivering an optimal balance of strength, softness, and cost efficiency. The advanced **MVS** spinning technology ensures low hairiness, enhanced fabric smoothness, and superior resistance to pilling, making these products highly suitable for intensive institutional laundering and extended lifecycle.
