

## **Institutional & Hospitality Products Presentation**

WHITE BEDDING **PC 20/20 70X60** DUVET COVER, FLAT & FITTED SHETS, PILLOW COVERS

**MVS SPUN YARN PC BLEND WITH US COTTON** CONTAMINATION FREE – 3% SHRINKAGE UPTO 100 WASHES

**Available Fabrications**  
 T130, T144,  
 T180, T200,  
 T300, T400,  
 T500, T600 & T800  
 Knits

		SINGLE	QUEEN	KING	SUPER KING
<b>BREAK BED SHEET</b>	180X272 + 30cm				
<b>FLAT SHEET</b>			260X310 cm	285X310 cm	300X310 cm
<b>FITTED SHEET</b>		91X190+30 cm			

WHITE LUXURY BEDDING **TC 210 STRIPE**  
**SATEEN PC** FLAT, FITTED SHETS & PILLOW  
COVERS

**MVS SPUN** YARN PC BLEND WITH  
**US COTTON** CONTAMINATION  
FREE – 3% SHRINKAGE UPTO 100  
WASHES

		QUEEN	KING
FLAT SHEET LONG		260X300 cm	285x300 cm
PILLOW CASE	53X78+18 cm		

ADDING QUALITY TO LIFE

SOFT TOUCH WHITE LUXURY  
BEDDING TC-200 WITH **SINGLE  
MARROW** STITCH DUVET COVER &  
PILLOW CASES WITH FLANGE

**100% COTTON WITH SOFT  
TOUCH FINISH**

ADDING QUALITY TO LIFE 

SOFT TOUCH WHITE LUXURY  
BEDDING TC-200 WITH **DOUBLE  
MARROW** STITCH DUVET COVER &  
OXFORD PILLOW CASES

**100% EGYPTIAN COTTON** WITH  
**WRINKLE FREE FINISH**

ADDING QUALITY TO LIFE 

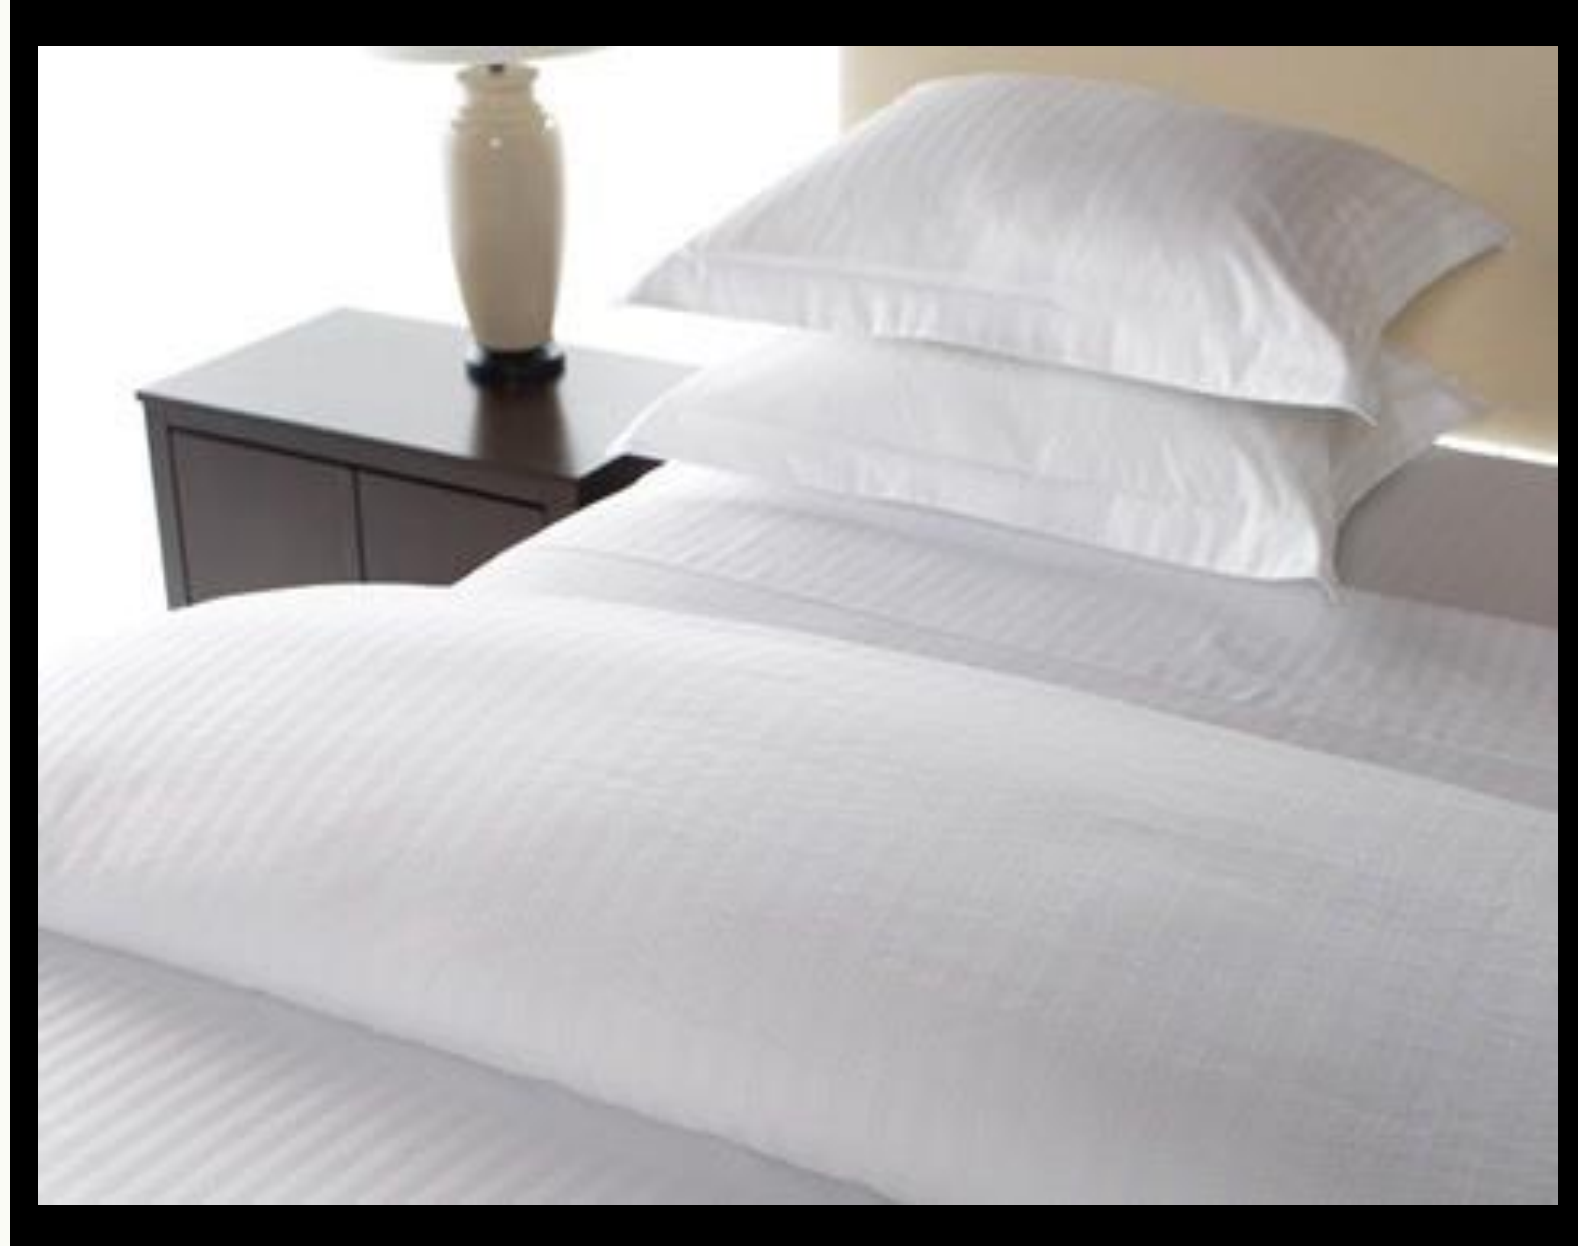

**WHITE LUXURY BEDDING  
STRIPE SATEEN DUVET COVER**

**Available Base Cloth**

- Dobby
- Jacquard

**Available Fibers**

Cotton, Polyester Blend, MF,  
Bamboo, Lyocell, BCI, Others

## Fitted Sheet

### Other Articles

Sheets, Duvets, Pillows  
Protectors, Ruffles, Spreads  
& Cushions

## POPLIN SHEETS

ADDING QUALITY TO LIFE 

## DUVETS

Cotton & Poly Cotton.

### Various Sewing Details:

- Double Stitch
- Chord & piping
- Single Needle
- Overlock

### Filling:

- Direct fill
- Bonded
- Siliconized

## PILLOWS & PILLOW PROTECTORS MF, PC & 100% Cotton

### Various Quilting Options:

- Diamond
- Box
- Channel

**QUILTED PILLOWS & CUSHIONS MF,  
PC & 100% Cotton**

ADDING QUALITY TO LIFE 

## COVERLETS & BED SPREADS

100% Cotton

ADDING QUALITY TO LIFE 

## PRODUCT ATTRIBUTES - MVS YARN

The yarn of above products is specially made using **MVS (Murata Vortex Spinning, Japanese technology)** to ensure exceptional durability, capable of withstanding up to 100 washes. The key to this product's performance lies in heat setting at high temperatures.

**Below are the key benefits of producing white sheets using MVS yarn and our specialized process:**

### 1. MVS Yarn Characteristics

- ✓ **Low Hairiness:** MVS spinning produces yarn with minimal hairiness, resulting in smoother, cleaner, and more durable fabric surfaces. This significantly reduces pilling, even after multiple washes.
- ✓ **Compact Structure:** The tightly bound yarn structure enhances fabric strength and minimizes fiber loss during repeated laundering.
- ✓ **High Strength and Abrasion Resistance:** The high-tenacity yarn ensures sheets are resilient against wear and tear during washing cycles.

# PRODUCT ATTRIBUTES - MVS YARN

## 2. Improved Laundering Performance

- ✓ **Shrinkage Control:** The balanced poly/cotton blend ensures minimal shrinkage, maintaining the sheet's original dimensions post-wash.
- ✓ **Quick Drying:** Polyester fibers in the blend enable quicker drying, reducing wear from prolonged exposure to dryers.
- ✓ **Color Retention:** The compact yarn structure ensures superior dye retention, keeping the sheets vibrant despite frequent laundering.

## 3. Enhanced Fabric Performance

- ✓ **Resistance to Fiber Loss:** MVS spinning minimizes linting, ensuring the sheet fabric remains intact even after extensive washing.
- ✓ **Elastic Recovery:** The poly/cotton blend offers excellent elastic recovery, preserving the sheet's fit and appearance over time.

## AVAILABLE FINISHES

Sadaqat offers a range of Finishes that can be tailor-made to fit the requirements of every one of our valued clients.

- 1. Water & Oil Repellent:** Protects the wearer from spills of water and oil without disturbing the air permeability of fabrics.
- 2. Stain Release:** Stains of oils, sauces, drinks, coffee etc. are removed easily by ordinary domestic washing procedure.
- 3. Easy Care – Pre Cure:** The tendency of fabrics to wrinkle during washing is tremendously reduced and wash and wear properties are introduced.
- 4. Easy Care – Post Cure:** Used to produce permanent press garments. The garments retain their shape even after multiple laundering. This saves valuable ironing time and energy.
- 5. Anti-Bacterial:** The multiplication rate of bacteria is significantly reduced. The fabric remains fresh and free from bad odor.
- 6. Shrink-proof:** Garments retain their sizes through out the life cycle. Fabrics do not shrink or grow during laundering.
- 7. Anti-Static:** Enhance comfort factor by reducing the static charge deposition and clinging tendency of garments, especially those made from synthetic fibers. This finish prevents the production of sparks and is an invaluable property for many industrial processes.

## AVAILABLE FINISHES

- 8. Moisture Management:** Supports the natural cooling system of body by dissipating perspiration efficiently and drying quickly. The overall result is enhanced comfort.
- 9. 3M Stain Release:** The safest stain release based on fluorocarbon C4 chemistry. Imparts excellent durable stain release effect with oil repellence and water resistance.
- 10. Peaching / Emerizing / Brushing:** This is a mechanical finish used to produce fabric surface with enhanced soft handle and characteristic peach skin feel.
- 11. Industrial Laundering:** Colour stability to a great number of industrial launderings is a key demand of workwear garment leasing business. These fabrics have high colour stability and the garments retain their colour memory even after 50 industrial launderings (ISO 15797) with shade change as good as 4.
- 12. UV Protection:** Minimize the skin damage due to long term exposure to UV radiations from sun by enhancing the collar protection factor (SPF).
- 13. Flame Retardant:** Minimize the life damage in case of fire accidents. The fabrics retard the spread of flame and provide sufficient time to the wearer to escape from fire.

## AVAILABLE FINISHES

**14. Anti Pilling:** These fabrics have a very good pilling resistance and ensure excellent pill free appearance throughout the garment life.

**15. High Abrasion Resistance:** These fabrics are made with the finest grade fibers and finished in a way that to get excellent abrasion resistance even more than 100 K cycles. These products are specialized to meet the rough and tough industrial garment needs.

**16. Chemical Protection:** Chemicals like strong acids, alkalis and organic solvents may cause fatal injury if got contact to skin. These fabrics protects the wearer against chemical spills. These fabrics do not allow the hazardous chemicals to penetrate and make contact to skin.

# KEY BENEFITS OF DIRECT FILLING

## 1. Enhanced Loft and Fluffiness

With direct filling, each duvet is filled with precisely measured polyester fibers, ensuring a consistent loft across the product. This method enhances the duvet's natural fluffiness and provides a cozy, inviting feel.

## 2. Superior Comfort and Even Distribution

Direct filling ensures even distribution of fibers throughout the duvet, avoiding clumping and cold spots. This results in a more uniform layer of insulation, keeping users comfortable and warm throughout the night.

## 3. Increased Durability

The improved filling technique prevents fibers from shifting or bunching up over time, extending the duvet's lifespan and maintaining its comfort level. This durability translates into long-term value for the customers.

## 4. Streamlined Production for Faster Turnaround

Our new direct filling plant increases production efficiency, allowing us to respond to orders more swiftly. This improvement can help us better meet seasonal demands and keep inventory well-stocked.

## 5. Cost-Effective and Environmentally Friendly

Direct filling minimizes material waste, creating a cost-effective production method. The efficiency also aligns with sustainable practices, minimizing our environmental impact—a value we know is important to your brand as well.

**THANK YOU**
