

BENCHMARKING SUPPLY CHAIN EFFICIENCY

Accuracy, Precision, and Consistency in Ongoing Production

ColorWarehouse is the industry-first solution for benchmarking global dye house performance.

Launched in 2008, this unrivaled system is a B2B platform to manage, monitor, and react to all color production data uploaded by connected suppliers.

natific ColorWarehouse is more than a solution for current production monitoring. You can also track performance data over time to make better strategic decisions for future development. Digital color technology provides powerful knowledge for now and for the future.

“

It allows us complete transparency into the color performance of our CAP accredited mills without requiring them to submit physical bulk lots. There are no other integrated solutions like this that we've ever seen.

-Under Armour Color Development Team

”

KEY BENEFITS

**MONITOR COLOR
CONTINUITY OVER TIME**

**ANALYTIC TOOLS
TO GENERATE
BENCHMARKING KPI**

**MAXIMUM COLOR
COMPLIANCE, MINIMUM
ADMINISTRATION**

Business Intelligence and Color Analytics

Convenient Functionality

The ColorWarehouse is full of powerful color analytics and functions. It stores all historical data so the more you and your partners upload, the more useful your reports will be.

Let the ColorWarehouse do the admin work for you with real-time data and statistics to support your decision-making.

While traditional color managers assess all samples, those working with ColorWarehouse need only focus on evaluating the exceptions. Why waste valuable time checking in-tolerance submissions? For any given time period, brands can view KPI's of all mills – by batch, DE levels, tolerance %, and more. This allows easy evaluation of total mill performance against given targets.

This is one of the many unique and convenient functions of the ColorWarehouse over traditional QC software packages: Compare shades and view performance data of all of your participating mills so you know exactly how your supply chain is operating on a variety of fixed or custom KPI's. With access anywhere, anytime.

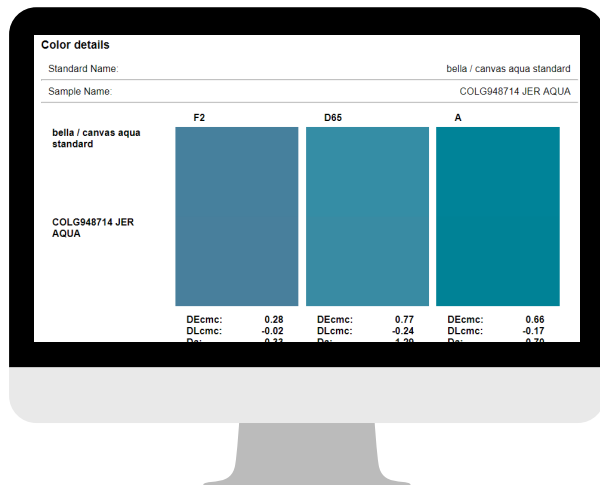

CAP Overall Performance Global View

By selecting multiple weeks, an average of the weekly statistics will be displayed.

From Date: 2018-03-26
To Date: 2018-09-16

Load

Mill Name	Type	Samples	Average DEcmc
Y.R.C. Textile co., Ltd.	EX	50	0.64
Best Pacific Textile LTD	EX	960	0.73
Pride Performance Fabrics S.A de C.V.	EX	854	0.66
Taily Dyeing & Finishing Co., Ltd.	EX	60	0.66
Tong Siang Co. Ltd.	EX	459	0.64
Milteks Tekstil San. Tic. A. S-MARSAN	EX	408	0.58

Customized Reporting

This cloud-based system is fully equipped with customizable reports that can be pulled from the system as needed and shared with your partners.
