# AUTOMATIC BACK POCKET SETTER WITH FOLDING GROUP

## VM02

FLEXIBILITY

EFFICIENCY

QUALITY

Automatic programmable pocket setter machine with folding group, Vibemac model VM02, is the most efficient solution on the market.

High productivity combined with excellent quality are the strengths of this automatic machine. The retractable inner clamp ensures high stitching quality across various fabrics. Its ease of use enables even non-expert workers to operate it without any effort.

Moreover, the absence of a pocket creasing machine not only saves space but also energy consumption. It enhances productivity from the very first minute, as there is no need to wait for the creasing machine to reach its operating temperature.

Custom pocket jigs can be made locally or shipped with sewing programs in a matter of days. Additionally, programming and program adjustments can be easily done directly on machine's interface.

### ▶ NEW PATENTED FOLDING SYSTEM

It guarantees optimal results for all fabric types and pocket shapes, even in case of pockets with just 7/8mm of excess material, ensuring perfect quality results after washing

### ▶ BRUSHLESS MOTOR

For moving the fabric between the various work stations, to ensure high speed and precision

## TECHNICAL SPECIFICATIONS

Max sewing speed: 2700 rpm

Sewing area: 300 x 236 mm

Productivity (regular medium sized pocket): 130 trousers/hour

Power supply: 230V mono phase

50/60 Hz, 1.0 kW

Air consumption: 0.6 L/cycle

Air pressure: 5.5 bar

## FEATURES

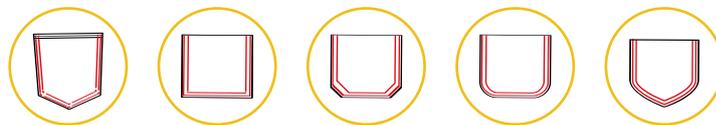

---

- › Height of the presser foot managed by a step motor, programmable in the sewing cycle
- › The sewing head features a shuttle hook allowing for sewing with thick upper threads or multiple threads simultaneously
- › Quick change of jig managed by operator panel
- › 3 laser pointers for fast and precise aligning of the material
- › Worktop coated in SERIFLON (special surface treatment containing Teflon) which allows optimal sliding for all types of fabric
- › Compact stacker design for optimal performance even during highspeed operations

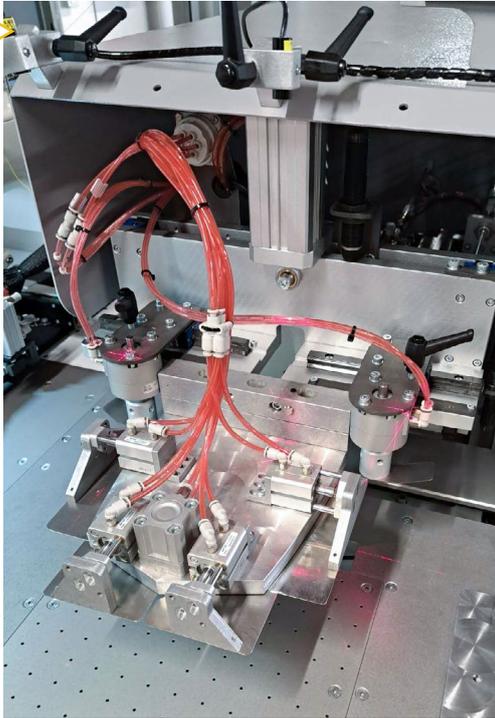

## OPTIONAL

---

- ✓ Looseness kit for allowance of the quarter panel
- ✓ Reinforcement under the quarter panel to strengthen the bartack of the pockets
- ✓ Protection barrier to ensure extra safety in working environment

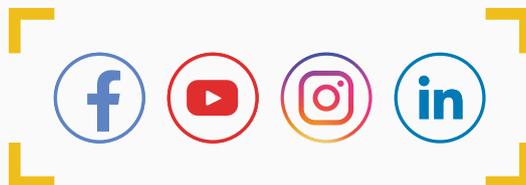

MANY KIND OF POCKETS
