

BUTTON ATTACHING BAT Machines

buttonfuse® technology since 1994

The cost effective range of machines designed for specialist tasks

Ultra consistent & reliably accurate

Fast cycle time & so easy to operate!

The BAT range of machines have been developed over time to fully satisfy the demand for a reasonably priced button attaching machine for specific tasks such as jacket button attachment with show stitch, shank button attachment and leather or raincoat button attachment with backing button. All the machines are easy to use and feature simple shank height adjustment which is essential prior to perfect shank wrapping.

SPECIFICATION

FEATURES

The fusible
elastic core makes
buttonfuse®
TF thread
super strong!

**Proven & specified
by the major brands
of the world.**

**We have the world's
largest range of
threads + our high
stockholding levels
mean that they are
readily available
exactly when you
need them most!**

Our thread is the ideal partner to the
buttonfuse range of machines. The
high quality components guarantee
button security from shirts to raincoats.

Manufactured to be 100% consistent to
ensure a perfect shank appearance with
a soft finish. A fusible & highly elastic
core makes buttons secure & super
strong with no loose ends.

Our thread has been tested to withstand
the rigours over the lifetime of the garment.
It is certified by Oeko-Tex & complies
with all other industry standards.
