MESSAGE FROM DESIGNER

Hello, friend !!CIAO, it's a pleasure for meet you here.

I'm marco ,a designer from Italy. In the early stage of designing this single head machine for YUEMEI,I did a lot of market research on product application in Europe. For a equipment that service personalized need,it needs to be super personalized. The strength of the product structure is the foundation. On a strong foundation, ever line outlined, every color selected, every details processed, must be in line with our application scenarios and usage. Thus, the product can be integrated with the scene, which is not only a landscape, but also a work of art, but also a piece of industrial equipment with excellent performance

Italy Designer
