

**We  
have the  
solution!**

**BU  ERGO.FOL**  
**OUR QUALITY – YOUR SUCCESS**

FILM EXTRUSION · PRINTING · LAMINATING · FINISHING

**Product  
range**

- ENVIRONMENTALLY FOCUSED
- ENERGETICALLY INTELLIGENT
- ECOLOGICALLY COMMITTED

**After years of forward-looking developments and activities we are proud to present you our new company logo:**

**BUERGO.FOL**  
OUR QUALITY – YOUR SUCCESS

Our intention is to show that the green aspect is part of our identity and daily worklife.

Not only the fact that Buergofol being part of an energy intense industrial sector has been working according to the Energy Management System DIN EN ISO 50001 since 2019 already, but also the new composition of our product portfolio expresses our commitment: protect the nature with plastics packaging!

The actually only immediate effect beyond energy reduction can be achieved by the use of RPET films made from 100% recyclable material, being 100% recyclable, being 100% reusable in the same recycling circle repeatedly.

Open this brochure: Our afore mentioned recycling highlight can be combined with a wide range of sustainable top webs; from lockseal films to easy/safety-peel ones; from more complex skin webs to our solutions with 10 and 14 layers: Each technology designed for recycling.

Also our flexible thermoforming and flowpack films with a status of MONO materials need to be emphasized: MONO means future in every sense.

And Buergofol still goes further: The step towards paper solutions with PREMIUM optics at the same time: FLATSKIN and FLATMAP prove that Buergofol is not plastics, but a green mission.
