

## VI-11\_200 Underleaver

**Slegers Technique**   
*the art of slicing and interleaving*

## Technical Information

**Machine**  
Underleaver

**Speed**  
Max. 300 items/minute  
(Product type and size depending)

**Brand**  
Sleegers Technique

**Type**  
VI-11\_200

**Paper dimensions**  
Width: 50 – 180mm  
Length: 70 – 1000mm  
Max. diameter: 400mm

**Specs**  
Touchscreen with multi-language selection  
User friendly interface  
Solid stainless steel construction  
Hygienic design  
Servo driven  
Compact footprint

**Options**  
Custom conveyor configuration  
Adjustable workheight  
Product flow L > R or R > L

**Electrical supply**  
360-520Vac | 50/60Hz | 3 Phase

**Air supply**  
10L/minute @ 8 Bar

**Weight**  
375 kg

### FEATURES & BENEFITS | VI-11\_200

The VI-11\_200 is the smallest underleaver in the VI-11 series with a belt width of 200mm. This machine can be used for many different types of paper, foil and meat pad.

The complete servo driven system is fast, accurate, reliable and guarantees accurate and constant results.

The user friendly interface makes it easy to switch between recipes, change parameters and see your production history.

This machine is developed with an eye on hygiene, operation and maintenance, it can be cleaned in just 3 minutes and with standard IP65 classification suitable for cold and wet environments.

This machine is able to communicate with any other machine and can easily be integrate in new orexisting production lines.
