

## Looking for:

- *A barrier shrink film?*
- *Recyclable?*
- *For modified atmosphere overwrapping?*

*Pack & Protect with*

# — OXBTEC® —

**Bolfresh® OXBTEC** are barrier shrink films for modified atmosphere overwrapping.

Formulated with barrier and antifog properties, they are ideal for the packaging of fresh food product units.

- Prolong the shelf life of foodstuffs and fight against food waste
- Prevent liquids from escaping the package and reduce the sanitary risk of cross contamination through reinforced sealing properties
- Offer an attractive shelf appearance with superior transparency and gloss
- Allow high speed overwrapping and flexibly to use a tray or not

1

Reducing food waste

2

Encouraging recycling

3

Acting for circular-based  
packaging

# OXBTEC

---

*Thickness ( $\mu\text{m}$ ) : 20 / 23 / 25*

This solution is dedicated for horizontal form fill seal machines.

It differs from competition through exceptional optic performances.

Also, sealing and tear resistance are obtained due to high mechanical properties.

# OXBTEC-R

---

## Recyclable

*Thickness ( $\mu\text{m}$ ) : 20 / 23 / 25 / 30*

OXBTEC-R is a new food contact recyclable barrier shrink film.

After use, it can integrate the flexible PE recycling stream, 04 PELD, following the CEFLEX guidelines « Designing for a circular Economy ».

# OXBTEC-RCB

---

## Recyclable Circular Based

*Thickness ( $\mu\text{m}$ ) : 20*

OXBTEC-RCB is a pionerring packaging film - an important step toward **packaging sustainability** and **circular economy**.

It is made with **high quality advanced recycled circular polymers**.

These polymers use a feedstock made from 100% used **mix plastic waste** and are developed using an innovative technology called **advanced recycling**.

Mix plastic waste is broken down into their basic chemical elements and turned back into the equivalent of virgin plastic, suitable for newfood contact applications.

# More about BOLLORE PACKAGING

**Bollore Group** through its Packaging Films Division is one of the world leaders in the manufacturing of ultra thin shrink films.

For more than 40 years, by providing innovative solutions, the company has helped food processors and consumers alike, to minimize their environmental impact.

The core of its portfolio includes :

- **Bi oriented Polyethylene recyclable films**
- **Ultrathin** range of products (less than 25 microns) for “**lighter weight**” and no “**excess plastic**” packaging.
- Efficient products due to a **strong technical expertise** and the extensive use of high tech resins.
