## Ultrathin lidding shrink films for tray sealing applications

Our **LIDTEC** films protect and ensure the perfect preservation of fresh food products, thus contributing to limit food waste.

More benefits - they ensure a barrier to bacterial and viral contamination.

By offering leak-proof packaging, LIDTEC prevent liquids from escaping the package and this allow for safe handling. Industrial manufacturers and final consumers value a clean and safe package and have the risks of cross contamination eliminated both in the grocery store and at home in one's refrigerator.

They demonstrate every day their full capacity to respond to the essential needs for hygiene, food safety and traceability.

## Other sealing solutions complete our LIDTEC range:

- **LIDTEC LB 500**, non barrier and recyclable, is ideal for food fresh products with short shelf life, as well as for frozen products.

It can replace PVC stretch films to contribute to a better environment.

- Bolloré offers high-definition **printed films**. For branding purposes and a full appeal of yours trays, **LIDTEC®** are printable.
