

## Reels for Minced Meat

We offer waxed paper, plasticized coated paper, siliconed paper and parchment paper among others.

Width, diameter and length according to your needs.

These reels are used in high production minced meat and burger forming machines as well as in all types of interleaving processes.

### MORET PACKAGING

Since 1980, food packaging products (interleaver & underleaver) have been manufactured by our company.

Moret Packaging is an experienced and veteran company. Its young and dynamic CEOs are highly committed towards quality. This focus on quality culture has allowed us to gain the recognition of our customers over the years. Focused on the meat industry we provide all sorts of materials and aids used in the packaging field.

Our high level of specialization leads to a high volume production that allows us to offer the best value on the market at an excellent service level. We have been suppliers of some of the most important meat industries around the world for years.

Moret Packaging is your specialist in packaging for the meat industry.

TECHNICAL PAPER AND  
AIDS FOR MEAT  
INDUSTRY

Patty paper and reels for hamburgers  
and minced meat.

## Interleaver in Sheets

We have different options of paper interleaver. All of them provide a great release effect, so it is very easy to remove it from meat. They are very resistant to humidity and grease and some of them allow the complete transpiration of meat. Our paper works perfectly in high production machines. It is provided in different sizes with hole and edge guided if necessary.

## Interleaver in Reels

We manufacture reels in different materials such as waxed paper, plasticized paper and parchment paper among others. They are normally used in automatic forming machines, and we supply them in different widths and diameters according to your needs.

Our reels work perfectly in all burger machines.

## Parchment Paper

We provide baking parchment paper. Our paper has been specially treated for oven use.

We manufacture it in different sizes for an industrial use. It is grease and moisture resistant and it supports perfectly high temperatures.

## Professional Burger Press

We provide the most simple and effective professional burger press on the market. Made entirely of stainless steel, they are the best option for butchers and small industries and they are available in the following sizes: 50, 65, 100, 130 and 150 mm

## Quality Certification

We are absolutely committed to quality and food safety. For this reason, we are a BRC/IoP certified company. BRC is a leading safety and quality certification programme that guarantees the standardisation of quality, safety and operational criteria. The highest technology and quality at your disposal.
