

New electronic saw RBC

As a consequence of the overflowing demand on the food market, a growing number of companies are demanding accurate, versatile, and safe automatic bandsaws which have to be adapted to tight spaces.

To attend to these new needs, Mainali launch to the market the **RBC**, which is equipped with a security system that works automatically when the gates that give access to the loader are open, avoiding that the operator can be hurt.

The movement of the movable table and the clamps are both driven by a servomotor, providing maximum accuracy from the first until the last cut.

The reading system of the piece through the photocell reduces the cycle time since the operator only has to place the product on the loader and push the start button.

The exit belt through the product is lead out of the band-saw makes this a widely versatile machine, being able to cut any frozen or fresh product, either meat, fish, or vegetables.

Depending on the product size, one or more pieces can be cut at the same time.

Its design compact and from easy installation and start-up performs this machine a genuine plug and play along with its reduced size makes it a machine that can fit in any space.

Furthermore, this machine shares maximum security and is easily cleaner than the other automatic bandsaw from Mainali.

Dimensions	2100 x 1100 x h= 2000
Standard table dimensions	770X410mm
Voltage	220/400/480V; 50-60Hz
Compressed air	6 bar
Weight	1080kg

Long life technology.
