

Your partner for innovative marking

The HM Group is with more than 50 years of experience one of Europe's leading and most innovative companies within industrial marking and labelling.

Through HM Systems and Collamat AG, the HM Group has delivered more than 100,000 labelling and marking solutions directly or through a global network of more than 50 distributors.

With huge investments in a new modern headquarters, significant development activities and lean production, HM has positioned itself as a leading player in future-oriented solutions for industrial labelling and marking.

HM Systems is a leading manufacturer of standard products and customised product identification solutions in the business area of industrial labelling and marking.

Similarly, HM has the widest and most versatile product range on the market, providing standard products as total solutions within a wide range of industries.

Our core competencies include:

- Everything within labelling and marking solutions, as well as Print & Apply
- HM Linerfree® - a green labelling solution that streamlines operations and reduces environmental impact
- Label printers with all leading brands
- Ink-jet printers and laser marking
- Software and data collection solutions
- Product handling and logistic solutions
- Consumables from day to day
- A professional, nationwide service organisation

Development

With comprehensive experience within construction, electronics and software, HM has a unique competence within the development and implementation of custom-designed solutions.

Our experience, wide product programme and technical know-how makes us a unique partner developing the optimal solution for you.

Our quality is second to none and our solutions are built and tested in our own factory. This is your guarantee for future-oriented, quality solutions at a competitive price.

HM works towards the development of future solutions within product identification and focuses specifically on environmentally friendly solutions, data collection, OEE data, PackML/OMAC standards, IIOT and remote access through cloud solutions.

Future-oriented solutions

Lean production

Focus on R&D activities and innovation

Through centralisation of production and R&D in Denmark, a high level of quality and competence is ensured.

The centralised structure allows us to optimise business processes exploit the many new technologies and bring more value to our products, services and customers.
