

*Your specialist
for frozen food services.*

Dear Business Partner,

With state-of-the-art deep-freeze storage technology you guarantee the long-term quality and freshness of your products. Our solutions offer you many advantages:

Constant temperatures: Our deep-freeze storage facilities guarantee a stable temperature, which is crucial for the shelf life and quality of your products.

Large storage capacity: With the capacity to store up to 27,000 pallets, we offer flexible storage solutions to meet the needs of companies of all sizes.

Safe and reliable: State-of-the-art protection systems and monitoring equipment protect your products around the clock against temperature fluctuations and technical faults.

Flavour and nutrient preservation: Optimised storage temperatures preserve the flavour, texture and nutrients of your products for a prolonged period of time.

Energy efficiency: Our high-performance deep-freeze storage facilities are also energy-efficient, which helps you to save costs and contribute to climate protection.

Flexible solutions: Our computerised storage solutions can be tailored to your individual requirements, whether you are storing food, pharmaceuticals or other temperature-sensitive products.

Experience the difference! Trust in our frozen storage expertise and state-of-the-art technology. Talk to us.

Best regards,
Christian Schöner
Head of Controlling & Inventory Management
