About Us

25+ YEARS OF EXPERTISE SET US APART

The M FOOD GROUP® is a driver of innovation in the food industry. We develop tailor-made product solutions that not only meet today's requirements, but above all shape the trends of tomorrow.

Our aim is to further develop the food industry through innovation and technology. With a clear focus on product development and trendsetting, we support our customers and partners from the initial idea to market readiness. Our work is based on many years of expertise, state-of-the-art technology and a deep understanding of their needs.

Together with you and our partners, we create solutions that will be successful on the market in the long term in this dynamic sector.

FULL SERVICE

From development to the scale-up process, we are there for our customers and partners.

INNOVATION

We see ourselves as a driver of innovation within the food industry.

TRENDSETTING

We actively set trends and develop the trend products of tomorrow.

About Us

OUR FOCUS

Our thinking is holistic, our solutions future-oriented. With this principle in mind, we challenge the status quo every day and set new standards for innovative food products.

The focus is always on our customers and partners, with whom we develop market-ready trend products. This is our mission, which we always pursue as a team with the greatest possible commitment.

**REAL VALUE FROM OUR
FOOD TECHNOLOGY EXPERTS**

Product development

FROM CONCEPT TO MARKET READINESS

We not only support you with new or further development of your products but also assist you with the scaling and optimization of your processes directly on site.

With our comprehensive expertise, we offer you genuine full-service performance that covers all relevant steps along the entire supply chain. From the initial concept through development and sample production to the integration and optimization of production processes, we are at your side as a reliable partner.

OUR PATH TO A BESTSELLER

TAILOR-MADE PRODUCT SOLUTIONS

Our product solutions are designed to optimize manufacturing processes, improve sensory quality and successfully position products on the market. With specifically coordinated starter and protective cultures, functional additives and spice components, we offer customized solutions based on proven standards for food production.

- Proven standards with customization options
- Precise dosing to the gram for easy application
- Support during the scale-up
- Developed by experts in the food industry

1

STARTER & PROTECTIVE CULTURES

Supports optimum fermentation processes and ensures maximum product safety and stability.

2

FUNCTIONAL ADDITIVES

Technological helpers for perfect stability, color, texture and durability of the end products.

3

SPICE COMPONENTS

Spices and flavorings dosed to the gram for an optimal taste experience for the end customer.

STARTER & PROTECTIVE CULTURES FOR OPTIMAL FERMENTATION

Starter and protective cultures play a decisive role in the production of safe, stable and high-quality food.

They ensure reliable fermentation, contribute to the desired flavor development and extend the shelf life of products, all without any artificial additives.

Our cultures are specially adapted to the respective production processes and requirements and enable precise control of microbial processes.

-  Reproducible fermentation
-  Flavor & texture development
-  Extended shelf life
-  Without artificial additives

Product solutions

FUNCTIONAL ADDITIVES

Functional additives optimize the technological and sensory properties of foods and offer targeted solutions for stability, texture, shelf life and nutritional profile.

Through the targeted use of these additives, manufacturing processes can be made more efficient while maintaining the desired product performance. Our solutions support manufacturers in meeting current market requirements and creating innovative food products.

-  Optimization of texture and stability
-  Targeted functional properties
-  Improvement of the nutritional profile
-  Differentiation in the market through distinctive qualities

INNOVATIVE SPICE COMPONENTS

Our spice and flavoring components are a decisive factor in the perception and differentiation of foods.

The targeted combination of spices, aromas and extracts allows both classic and innovative flavor profiles to be developed that are perfectly tailored to the respective product. Our spice components ensure a unique positioning on the market and guarantee a consistent flavor thanks to their simple, precise application.

-  Precise flavor profiles without variations
-  Modular formulations for individual customization
-  Individual integration into complex recipes
-  Minimization of off-flavors

What makes us special

OUR SECRET TO SUCCESS

For us, success is reflected in the stories of our customers. We work together to create success stories that move markets and set new trends.

Every collaboration is characterized by a clear goal: to develop innovative and market-ready solutions that inspire the market today and in the future.

The foundation of our success is the in-depth expertise and many years of experience of our team.

For 25 years, we have been transforming visions into tangible results with passion and innovation – always with the aim of offering our customers a comprehensive supply chain with genuine full service.

Our history, expertise and, finally, the numerous trend products of our customers speak for themselves and serve as a benchmark against which we are always happy to be measured.

TANGIBLE CASES FOR OUR EXPERTISE

Bastian Freese

RESPONSIBILITY FOR TODAY AND TOMORROW

For us, sustainability is a continuous process that combines economic, ecological and social responsibility.

We optimize processes so that they conserve resources, are economical and sustainable – from the availability of raw materials to efficient supply chains and site expansion.

As an employer, we create sustainable jobs and drive digitalization forward to combine sustainability and efficiency.

At the same time, we meet the highest compliance standards, including the ZNU standard, and always act transparently, responsibly and with foresight.

Our guiding principle is clear: for us, sustainability means making the right decisions today so that we can continue to act competitively and responsibly tomorrow – for our customers, our environment and our future.

You can find out more about responsibility online: m-foodgroup.de/en/responsibility

QUALITY IS THE MINIMUM WE REQUIRE

Our certified company processes – including IFS Food, ISO 9001 and FSSC 22000 – guarantee precision and safety at every stage of development. We rely on transparent processes and continuous improvement to respond flexibly to the requirements of this dynamic industry.

-  Globally recognized certifications
-  Dedicated class 10 cleanroom with laminar flow
-  Strict recording of all processes
-  Traceable and proven network of suppliers
