ERP meets AI:

At IFFA 2025, CSB showcases smart solutions for meat companies and alternative protein manufacturers

CSB-System SE will present new solutions around its ERP system at the IFFA in Frankfurt from May 03 to 08, 2025. Following the slogan "Mastering Meat Business with CSB", the industry specialist offers new solutions to digitalize and optimize processes in meat and alternative protein businesses.

With the CSB-System, enterprises manage their complete value chain, from the management level to production and mobile applications. The integrated processes and data flows enable fast and informed decision-making – a capability that is vital in today's cut-throat competition.

At their IFFA booth D99 in hall 12.1, CSB's experts provide personalized advice and information around the following focus topics:

- **Integrating data:** ERP, MES, Overall Equipment Effectiveness, Computer Integrated Manufacturing, Reporting & BI, Planning and Forecasting
- **Digitalizing processes:** Traceability, Quality Management, Production Optimization, Supply Chain Management, Process Monitoring
- **Transforming factories:** Automation, Robotics, Digital Twin, Industrial Image Processing, Artificial Intelligence, Cloud Computing

The spotlight at CSB's booth is on the "CSB Eyedentifier". CSB gives a live presentation of its AI-based image recognition system that automatically identifies, checks, and sorts raw materials and products; for example, in receiving, at cutting exit, during production, or in packaging processes. Together with its partners, CSB demonstrates use cases for the interaction between ERP, artificial intelligence, and cobots.
