

Making the impossible packable...

# Fresh industry solutions

CPS is since 1988 the specialist in case packing. Especially flexible bags in American style cases and shelf-ready trays, but also all type of trays, skin trays in cardboard trays, plastic crates up to roller containers. No challenge is too crazy for us! Due to our unique, modular systems and the resolving power of our team, we know how to pack the impossible. Our case packers have many option available to create a tailor made case packer for you. We are only satisfied if you are a satisfied customer.

**CPS** CASE  
PACKING  
SYSTEMS

The fresh industry, fresh potatoes/vegetables, or hard (stone) fruit. These products must pack gently horizontally in crates or containers without any drop height. Our CL64 and CL86 are developed to create first a layer of product in a cassette which lay down the product layer for layer in the crate or container. Bags, net-bags, carry fresh or trays in many variations can be handled. Our various high-quality case packer systems have been developed to process all these packages with high capacity.

## HORIZONTAL PACKING

### Our CL64 crate loader, packing without drop height!

The CL64 has been specially developed to pack (net)bags in crates or carton trays in many packing patterns with turn or no turn are possible. The cassette lowers into the crate and lay down your products layer for layer. For various packing patterns: in folding cases, carton trays and crates.

- Product speed up to 120 bags/min
- Max. case speed up to 20 crates/min
- Flexible packing patterns, turn-no turn
- Maintenance friendly
- Tool-less change-over, reduced downtime
- Easy to operate
- Standard remote access
